HASKELL

IMPLEMENT AND SEED COMPANY

24 Chapel Street

Lewiston, Maine

Read Carefully Before Ordering

All prices in this catalogue, owing to uncertain market conditions, are subject to change without notice. Should there be a drop in the market on any article (listed in this catalogue) at time of purchase, we will gladly give the customer the benefit of the reduction. This policy applies to all grain, grass, vegetable and flower seeds as well as all other items quoted herein. WE DELIVER all Vegetable and Flower Seeds when bought at the packet, ounce, or $\frac{1}{4}$ pound prices, but when seeds ordered are listed in pounds, postage should be added at the rate of 8 cents per pound. Each additional pound add 1 cent. Insurance 3 cents. In all other cases goods will be SHIPPED F. O. B. LEWISTON.

No charge for packing, unless otherwise stated. Bags will be charged for as follows: 2 bushel bags, 32 cents; $\frac{1}{2}$ bushel bags, 20 cents; peck bags, 15 cents; $\frac{1}{2}$ peck bags, 10 cents.

We give no warranty expressed or implied, as to description, quality or productiveness of our seeds, and in sending them out, will in no way be responsible for crops or lack of satisfactory product from our seeds. If the purchaser does not accept the goods on these terms, we must be notified at once, when we will give full instructions for disposition of such goods. This is the invariable rule of reliable business houses.

We do, however, purchase our seeds from reputable growers and employ every means, taught us from years of successful dealing in seeds, to insure proper grading and purity. Seeds are tested by our experts before offering them for sale, so we are as reasonably sure of their germination as nature and science permits of assurance.

PARCEL POST INFORMATION ON PAGE 12

NOTE—We would deem it a great favor if our customers, or those wishing to remain on our mailing list, thereby receiving our catalogue, would inform us of change in address.

“GOOD EQUIPMENT MAKES A GOOD FARMER BETTER”

Haskell Implement & Seed Co.

LEWISTON, MAINE

New England Telephone

Private Line 27

Last year on this page a message on the President's programme of accomplishment under the N. R. A. contained a forecast. Since the issuance of the Haskell 1934 catalog it is fitting to comment on the recognition that the farmer in particular and agriculture in general have received under the new deal.

Never before have so many agencies functioned in this direction nor has the personnel identified itself with so many distinguished rural-minded men.

Assigned to different duties are really big men who are daily devoting themselves to the cause of agriculture. Unusual things are happening to the direct benefit of farms and farmer in one or another section of the country. Patience must be exercised to allow the broadening of the practices, but one fact is paramount and that is that agriculture has finally come into its own.

CHOICE FLOWER SEEDS — General List

MOST flowering plants will live in almost any soil, but to give them a fair chance to develop, some care should be taken to make the ground suited to their needs. The soil best adapted for flowering plants generally is a light, friable loam, containing a sufficient amount of sand to render it porous. Many flowers are better if produced on plants of vigorous growth, hence a portion of the garden should be prepared by deep digging, thorough pulverization and liberal enriching with large quantities of well-rotted manure. Since some other varieties produce the largest and finest colored flowers when grown on rather light, poor soil, a portion of the garden should not be enriched. While some seeds need special treatment, the following general rules will apply to all. Make the surface of the soil as fine, smooth and level as possible; do not plant when the ground is wet; cover each lot of seeds to a uniform depth, which should be not more than four to six times the diameter of the seed; press the soil firmly over the seed; plant in rows so that the starting plants can be seen easily; thin out the young plants to prevent crowding and keep entirely free from weeds.

POSTAGE PREPAID ON ALL FLOWER SEEDS IN PACKETS AT PRICES QUOTED.

SPECIAL INDUCEMENTS.

When the money accompanies the order, purchasers of Seeds in packets at catalogue prices may select 25 CENTS' WORTH EXTRA PACKETS FOR EACH \$1.00 SENT. Thus anyone enclosing \$1.00 MAY ORDER SEEDS IN PACKETS AMOUNTING TO \$1.25. Two dollars sent to us with the order will pay for seeds IN PACKETS amounting to \$2.50 and so on. This offer does NOT include seeds in collections by weight or measure, bulbs, plants, or anything EXCEPTING SEEDS IN PACKETS.

Plants are generally known and described as Annuals, Biennials and Perennials. The term annual is applied to plants which flower and ripen their seeds the same season. Hardy annuals are those which may be sown in the open ground. Half hardy annuals are those which should be started in the house and transplanted to the garden. The term biennial is applied to plants which flower the second season after planting and then perish; the term perennial to plants which flower the second season after planting, and continue to flower year after year.

ADONIS. (Pheasant's Eye). Hardy annual. This showy plant with dark green feathery foliage bears small deep crimson flowers with dark centers. Remain in bloom a long time and keep long as a cut flower. One foot high. Pkt., .10

AGERATUM. (Floss-Flower). Half hardy annual. Blossoms continually throughout the summer and thrives in hot weather. Highly prized for bedding out, and valuable for winter blooming indoors.

Imperial dwarf. Dark blue. 9 in.; good for edging. Pkt., .10

ALYSSUM. Very hardy, free blooming dwarf plants, all varieties growing freely in common soil. The pretty, fragrant flowers are much prized for bouquets; excellent for the summer garden.

The perennial variety is very useful in the rock garden.

Little Gem. White. Hardy annual. They grow but three or four inches in height, very compact, of spreading growth, each plant often forming a circle a foot in diameter. Pkt., .10

Saxatile Compactum. Perennial. Grows about nine inches high, producing a mass of yellow blossoms. Pkt., .10

ALYSSUM

AMARANTHUS. Ornamental foliage. Very striking and effective decorative plants. Sow early and set out young plants early in June. Annual.

Tricolor. Mixed—Carmine scarlet, splendid variety. 4 to 5 feet. Pkt., .10

ANTIRRHINUM. (Snapdragon.) Beautiful, hardy, free blooming plants for summer and fall. Flowers the first year from seed as annuals and should be treated as such. Average height, 1½ feet.

- Crimson Pkt., .10
- White Pkt., .10
- Finest Mixed..... Pkt., .10

ANTIRRHINUM

AQUILEGIA. Columbine. Hardy perennial. One of the most beautiful of the old-fashioned flowers.
 Finest Mixed.....Pkt., .10

ASTER

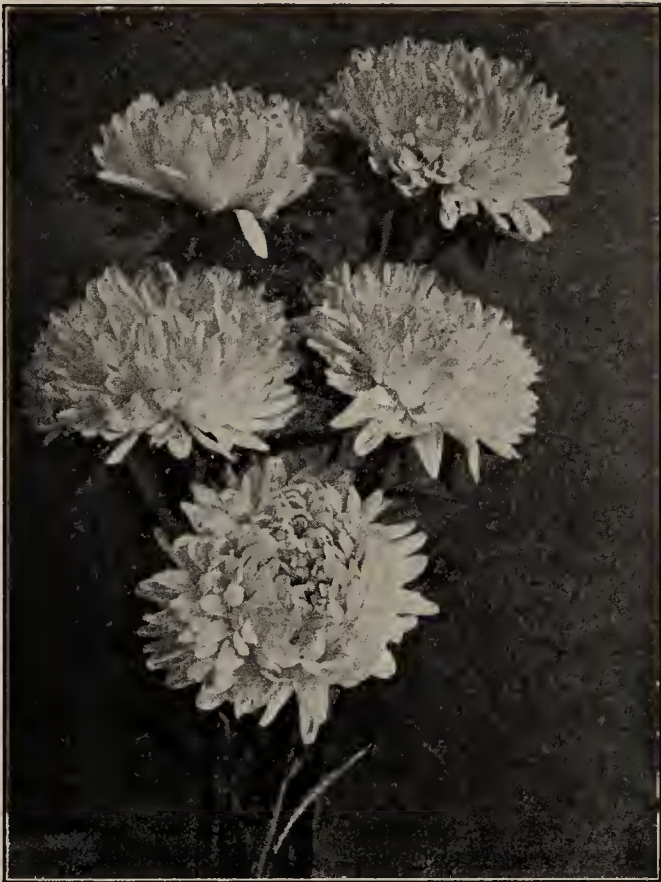

ASTER. One of the most popular flowers grown. Of easy cultivation. For July and August flowers seeds should be started in a hot bed. Seeds sown in the open ground in May will bloom in September and October. Fine for cut flowers.

AMERICAN BRANCHING. A free growing Aster of robust, erect habit. The blossoms are large and are borne at the end of each branch. They are almost round and are very desirable for cutting. Height, 2 to 3 feet.

- Crimson.....Pkt., .10
- Rose.....Pkt., .10
- White.....Pkt., .10
- Finest Mixed.....Pkt., .10

GIANT COMET. These are one of the most popular varieties. The plants are of a pyramidal form and the blossoms, whose petals are curled and twisted, are borne on long strong stems. They resemble Japanese Chrysanthemums. Height, 2 feet.
 Finest Mixed.....Pkt., .10

HEART OF FRANCE. The largest flowering dark red Aster grown. Opens red and deepens with age, retaining its beauty to the end. Flowers are borne on long strong stems. Height, 2 feet.....Pkt., .10

AMERICAN BRANCHING

QUEEN OF THE MARKET. An early flowering variety. Flowers are of medium size, fully double, and have long slender stems. Very fine for bedding. Height, 1½ feet.
 Finest MixedPkt., .10

- EARLY AMERICAN BEAUTY.** Magnificent large flowers carried on long stout stems. Vigorous, bushy plants. Height, 2½ to 3 feet.
- Blue.....Pkt., .10
 - Crimson.....Pkt., .10

- CALIFORNIA GIANTS.** Flowers are of large size with curled and twisted petals. Long stout stems. Height, 2 feet.
- Dark Purple.....Pkt., .10
 - Rose.....Pkt., .10
 - White.....Pkt., .10
 - Mixed.....Pkt., .10

ALL SORTS MIXED. A mixture of all varieties and all colors.Pkt., .10

BALSAM. Annual. Beautiful plants for the summer garden. They should be started early in heat and transplanted.
 Double Dwarf Mixed.....Pkt., .10

BOSTON IVY. A favorite hardy perennial climber with large five-lobed leaves turning to a bright red color in the fall. It easily clings to walls of wood, brick or stonePkt., .10

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

CALENDULA. Vigorous, hardy, free-flowering annuals, with large, flat, double flowers; valuable for growing in light soils, or dry situations. They are useful as cut flowers, and are frequently grown under glass during winter for cutting. 1 foot.

Calendula

BALL'S ORANGE. Beautiful well formed flowers of bright orange color and borne on long stems. Pkt., .10

RADIO. A new variety of Calendulas which is becoming very popular. The flowers are globular in shape with bristling quilled petals. The color is rich orange.Pkt. .10

CALLIOPSIS. A half hardy annual of quick growth, doing well in almost any location, and blooming throughout the season. It is exceedingly showy and of easiest culture.....Pkt., .10

CAMPANULA. Hardy perennial. These grand old flowers are of easiest culture, and one of the most attractive. Sow seed in the open the last of June or first of July, and transplant. They will bloom the following spring if protected over winter.

Medium. Old fashioned Canterbury Bell.
MixedPkt., .10
Cup and Saucer MixedPkt., .10

CAMPANULA. New Annual. A beautiful Canterbury Bell which blooms from seed in less than six months. MixedPkt., .10

CANNA. Indian Shot. Annual. The luxuriant foliage and superb flower of the Cannas, especially of the new French and Italian races, easily places them foremost among our sub-tropical plants.

Crozy's Newest Mixture.....Pkt., .10

CANDYTUFT. Showy, hardy annuals, growing about a foot in height. Excellent for bouquets.

Carmin.....Pkt., .10

Empress WhitePkt., .10

MixedPkt., .10

CARNATIONS—Marguerite—The earliest of all Carnations, blooming in July or August if sown in spring and continuing till frost. Being half-hardy perennials, a slight protection of coarse straw or pine boughs will preserve them during winter

Giant White.....Pkt., .10

Giant Rose.....Pkt., .10

Giant Red.....Pkt., .10

Giant Mixed.....Pkt., .10

CENTAUREA. Flowering Annuals. Giant Corn Flower. The flowers are of enormous size; and of the most charming colors, including white, pink, lilac, rose and purple. They are among our best summer flowers for cutting.

Dark Blue.....Pkt., .10

Cyanus—Bachelor's Buttons, mixed.....Pkt., .10

Centaurea Cyanus

CELOSIA, or Coxcomb. Showy annuals of easy cultivation; producing large, brilliant, comb-like flower heads. They prefer a light soil, and should not be allowed to become crowded if a dwarf habit is desired.

Tall Mixed.....Pkt., .10

CHRYSANTHEMUM (Annual Varieties)

Showy, hardy annuals of easiest cultivation and blooming early in summer. They are most desirable for sea-shore and mountain garden. Height, 2 feet.

Double MixedPkt., .10

COBOEA SCANDENS. Tender Annual. A fine rapid growing climber with handsome foliage and large, bell-shaped flowers, green at first but rapidly changing to a beautiful, deep violet-blue. Seed should be planted on edge in hot bed or rather dry soil and barely covered.Pkt., .10

CONVOLVULUS MAJOR—Tall Morning Glory. Hardy annual. The most popular and widely grown climber for covering verandas, trellises, etc.

Finest MixedPkt., .10

Japanese Morning Glory.....Pkt., .10

COSMOS. Annual. This is one of our most useful and beautiful autumn flowers. To get it in bloom early, the seed should be sown in May in the open ground where the plants are desired to bloom, and the seedlings allowed to grow and flower without being transplanted.

Finest MixedPkt., .10

Double Flowering MixedPkt., .10

COSMOS

CYPRESS VINE. Ipomoea Quamoclit. Very graceful twining annuals with feathery dark green foliage and star-like flowers. Twenty feet.

Scarlet.....Pkt., .10

DAHLIA. This popular flower can be easily raised from seed and flowered the same season. The roots should be placed in dry sand and kept in a cellar where there is no frost during the winter.

Finest MixedPkt., .10

DELPHINIUM—Perennial Larkspur. One of the most beautiful of the perennials. They are of easy culture and of vigorous growth.

The New Hollyhock Strain. Height, 3 to 4 feet.
Pkt., .10

DELPHINIUM

DIGITALIS. Foxglove. Biennial. Old-fashioned hardy plants producing spikes of thimble-shaped flowers, often two feet long.

Gloxinae flowered. MixedPkt., .10

DOLICHOS LABLAB. (Hyacinth Bean.) Annual. Purple. 10 feet.Pkt., .10

GAILLARDIA. Blanket Flower Perennial. Daisy-like flowers in various shades of yellow with dark brown centers. Blooms the entire season.

Finest MixedPkt., .10

ESCHSCHOLTZIA. California Poppy. The bright colors, long duration and dwarf habit of these free-blooming, hardy annuals, admirably adapt them for massing and border planting. Height, 1 foot.

California Alba—WhitePkt., .10

YellowPkt., .10

MixedPkt., .10

HASKELL IMPLEMENT AND SEED CO.

LEWISTON MAINE

DIANTHUS. Annual. Chinenses. Double Chinese Pinks. Finest MixedPkt., .10

Heddewigii (Japan Pinks). Single. First-class selected. MixedPkt., .10

Chinese Pinks

GOURDS. Luxuriant, climbing annuals, useful in covering arbors, fences or slopes, and bearing gourds which are of interesting forms and colors. 10 to 15 feet.

MixedPkt., .10

GYPSOPHILA. Infant's Breath. Annual. Free flowering, hardy plants, extremely light and graceful, easy of cultivation, and most useful for bouquet and cut-flower work. Height, 18 inches.

MixedPkt., .10

PERENNIAL INFANTS BREATH. Fine for bouquets. Blooms first year from seed if sown early.

WhitePkt., .10

HELIANTHUS. Sunflower. Hardy annual. The large varieties are useful in forming backgrounds of large beds or borders and for distant effects, while the smaller sorts may be planted with scarlet Salvia, Cannas and other tall bedding plants, besides being excellent for cutting.

Double MixedPkt., .10

HELIOTROPE. Delightfully fragrant greenhouse perennial; excellent for bedding or indoor cultivation and particularly useful for cutting.

Giant. Newest large flowering varieties mixed. Pkt., .10

HELICHRYSUM. Everlasting Flower. Showy annuals for beds or borders; useful as dried flowers for winter bouquets, for which use the blooms should be cut before they are fully open, and hung up to dry with the flowers downward if stiff stems are desired. Height, 2 feet.

Double Mixed.....Pkt., .10

HUMULUS JAPONICA. Japanese Hop. Splendid annual climber of fast growth and very ornamental. 12 ft.Pkt., .10

KOCHIA TRICHOPHILA. (Standing or summer Cypress.) Splendid ornamental annual of unusually quick growth, forming regular pyramids of about 3 ft. in height. The slender-leaved plants are of a cypress-like appearance during the summer, changing their light-green foliage to carmine and blood-red colorings. The plant, also called "Burning Bush," is of great value when planted singly or in groups, as well as for pot culture. 3 ft.....Pkt., .10

Helichrysum

Larkspur. Splendid hardy annuals with showy flowers borne on long spikes; white, lilac, and all shades of blue; excellent for cutting. Height, 18 inches.

Double Tall. Branching or stock flowered mixed. Pkt., .10

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

HOLLYHOCK. Hardy Biennial. This ever popular hardy favorite of our gardens has very few rivals in majestic grandeur. Hollyhocks succeed best in rich, well-drained soil. They should be lightly protected during winter with pine boughs, coarse straw, or other mulch not liable to rot. Seeds sown in July produce fine plants for blooming the following summer. 6 to 8 ft.

Chaters Strain. Double finest mixed. Pkt., .10

HOLLYHOCK

LOBELIA. Annual. The Erinus varieties are most valuable for edgings, hanging baskets and vases, blooming profusely from June till frost.

Crystal Palace Compacta. The darkest blue. Pkt., .10

LUPINUS—Hardy Lupines. A hardy, showy perennial with long spikes of flowers. Fine for cutting.

Finest Mixed.....Pkt., .10

MARIGOLD. Tagetes. These handsome half-hardy annuals when well grown cannot be surpassed either in mixed borders or when grouped together. They succeed best in moderately rich soil and in open situations, and are strongly recommended where a gorgeous display in the autumn is an essential feature.

African—Double tall yellow.....Pkt., .10

African—Double tall mixed.....Pkt., .10

French—Double tall mixed.....Pkt., .10

French—Double dwarf mixed.....Pkt., .10

MARVEL OF PERU—Four O'clock. An old-fashioned, sweet-scented annual of various colors. Useful for beds or borders. Height, 2 ft.

MixedPkt., .10

MIGNONETTE. Reseda Odorata. The most fragrant annual, prized as much for forcing in winter as for the summer garden. The seed should be sown early and the plants as they grow, thinned sufficiently to allow them to branch. The beds should be liberally watered during dry weather.

Parsons's White.....Pkt., .10

Machet, RedPkt., .10

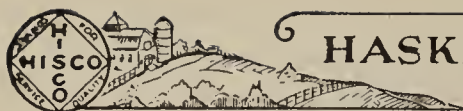

Sweet Scented Mixed.....Pkt., .10

MYOSOTIS—Forget-Me-Not. Dwarf, half-hardy perennials, bearing a profusion of little, star-shaped flowers. They thrive best in rather moist, shady situations. Most of them will bloom the first year from seed if sown early.

Palustris—True Forget-Me-Not. Dark blue, very beautiful; profuse flowering. Pkt., .10

MARIGOLD

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

NASTURTIIUMS

NASTURTIIUMS—Dwarf

Finest Mixed. Our special mixture of the finest sorts, in great variety of color.

Pkt., .10; oz., .15; 1-4 lb., .45

NASTURTIIUMS—Tall or Climbing.

Finest MixedPkt., .10; oz., .15; 1-4 lb., .45

NASTURTIIUMS. Double Sweet Scented. The most popular novelty of the past two seasons. The plants are semi-dwarf throwing out short runners. Stems are long and bear the flowers well above the foliage of the plant. Very fragrant.

Golden Gleam. Double. Golden Yellow.

Pkt., .10; Oz., .30

Scarlet Gleam... Double. Orange Scarlet.

Pkt., .30; Oz., \$1.00

Double Gleam Hybrids. A collection of gorgeously colored double flowers of many colors.

Pkt., .20; Oz., .80

NICOTIANA Affinis—Annuals.

Sylvestris. A splendid new variety with glaucous leaves and large pendants, pure white, tube shaped flowers; a very stately plant.

Pkt., .10

PAPAYER or Poppy. Annual varieties, showy, hardy annual of the easiest cultivation and embracing many rich and beautiful colors. The seed should be sown early in spring where intended to bloom.

Shirley—Finest mixed. A most charming race of single Poppies with shining flowers of silky texture, varying in color from pure white and delicate pink to rosy carmine and deep crimson; many of them being beautifully striped and edged with white. The blooms if cut when young will keep in water for two or three days. Height, 2 ft.

Pkt., .10

Double Carnation Mixed.....Pkt., .10

Perennial Varieties. These large flowered kinds are very imposing with their fiery blooms which are sometimes six inches across.

Oriental. Orange Scarlet with black center. Pkt., .10

PETUNIA. The Petunia is popular because it is of easiest cultivation, blooms from early summer continuously until frost and is one of the most showy and free-growing annuals. Height, 12 to 15 inches.

Single Flowering Petunia

Hybrida—Finest MixedPkt., .10

Fimbriata—Fringed, Single Mixed.....Pkt., .15

Rosy Morn. Pink, with white throat. Fine for bedding.....Pkt., .10

Howard's Star. Purple with white throat.....Pkt., .10

Double Flowering Petunia

Double Fringed—Extra Large.....Pkt., .20

DOUBLE FRINGED PETUNIA

PANSY

Pansy, or Heartsease. Too much importance cannot be attached to the culture of these beautiful plants, flowering as they do in great abundance for several months. When sown in the early spring a good display in most cases can be had in the following fall, but the best results are not obtained by so doing. To obtain fine blooms it is better to sow during summer and transplant the seedlings in cold frames in September, protecting during the winter with mats or shutters. Pansies delight in a cool, moist, well drained soil, enriched with decomposed barn-yard manure. They should never be allowed to suffer for want of water.

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

RICINUS. Castor Oil Plant. Tender annuals of rapid and gigantic growth, producing enormous dark green or bronze-colored palmate leaves; excellent for sub-tropical beds, or for massive foliage effects on lawns or backgrounds.

Zanzibariensis. Mixed. A new and distinct race from East Africa, producing leaves of enormous size, varying in color from light green to purplish red. Height, 15 feet,

Pkt., .10

SALPIGLOSSIS. Half-hardy annuals; elegant late summer flowering plants of great diversity in color; beautifully penciled in rich tints of yellow, purple and brownish red. Of easy culture.

Grandiflora—Finest Mixed.....Pkt., .10

SALVIA. Flowering Sage. Very ornamental; flowers borne in spikes of fiery red, crimson or blue, and continue in bloom in open ground until after severe frosts. Start in heat and transplant into light soil one or two feet apart. Tender perennials, but bloom the first season. Height, 2 ft. to 3 ft.

Splendens—ScarletPkt., .10

SWEET WILLIAM. *Dianthus Barbatus.* Showy, hardy biennials of easiest culture; admirable for clumps among shrubs or borders. Height, 18 inches.

Hunt's Perfection Mixed.....Pkt., .10

SWEET WILLIAM

SWEET PEAS

SPENCER VARIETIES

The Spencers are of exceptionally large size, the standard and wings waved or frilled and the general effect remarkably graceful and attractive. The plants are of vigorous growth and remain in bloom for a longer period than the ordinary sorts. They are produced abundantly on long stems, making them most desirable for cutting.

Asta Ohn. Suffused lavender, sometimes with pinkish tinge.

Countess. Bright, clear pink, sometimes darker toward the edges; very large with long stems.

Florence Morse. White with pink edge.

Helen Lewis. Rich orange.

King Edward. Brilliant crimson scarlet; very large size and of open form.

Nubian. Beautiful deep maroon.

White. Pure white. Beautifully waved and fluted. Very large size.

Mixture. A very fine assortment of the best varieties.
Separate Colors.....10 per Pkt., .20 oz.
Mixture10c per Pkt., .20 oz., .75 ¼ lb.

Bo-Peep. A Dwarf Spencer Sweet Pea. An excellent plant for beds or borders. Profuse bloomer of a salmon pink colorPkt., .20

ZINNIA

STOCK—Gilliflower. Half hardy annual. The charming colors, delightful fragrance and free-blooming character of the Stocks have made them favorite plants for both summer and winter cultivation. They are very effective for beds and borders, and their handsome spikes are invaluable for bouquets and floral decorations.

Large-Flowering, Double Ten-Week Varieties. Highest grade, pot-grown seed. The best variety for early summer blooming, producing massive pyramidal flower spikes of brilliant colors and delightful fragrance. Height, 1 foot.

- PinkPkt., .10
- WhitePkt., .10
- Finest MixedPkt., .10

VERBENA. The Verbena is one of the most decorative and easily grown bedding plants. If started in heat in March the seedlings begin to bloom in June and continue until frost. Plants raised from seeds are stronger and flower more freely than those grown from cuttings. Half-hardy perennials. Height, 1 foot.

- Hybrida—Mammoth mixed.....Pkt., .10
- Hybrida—Extra selected, dark blue.....Pkt., .10
- Hybrida Candissima, white.....Pkt., .10

VIRGINIA CREEPER (or American Woodbine)
 Though a common native climber, this is one of the best plants for covering unsightly objects, or it may be easily trained into festoons of exceeding grace and beauty.

Pkt., .10

ZINNIA. The double flowering Zinnias are among the finest annuals blooming from July till frost. The flowers are large, handsome, and in a variety of colors. Of easy cultivation in common garden soil. Seeds should be started in heat and transplanted. Our seed of these beautiful flowers is saved from the finest collection in France.

- Double Mixed.....Pkt., .10

WALL FLOWER. Perennial. Deliciously fragrant and combine many shades of color; the orange, purple and chocolate predominating; tender perennial, 1 ½ feet.

- Double MixedPkt., .10

WILD CUCUMBER. Hardy, vigorous climber, with very pretty seed-pods, large seeds; to be shown in the open ground in autumn. 20 feet.

Pkt., .10

XERANTHEMUM. Profuse blooming hardy annuals with "Everlasting" flowers; useful for winter bouquets; colors pure white and deep purple. Height, 18 inches.

- Finest Double Mixed.....Pkt., .10

Turnip	1 ounce	18 to 24 in.	6 or 7 to ft.	¼ to ½ in.	May to July.....	60 to 80 days

SUPERIOR VEGETABLE SEEDS

ASPARAGUS

German,—Gpargel.

Spanish,—Esparragos.

A convenient bed is about six feet wide, with a path two feet wide on each side. This will require six rows one foot apart, and a bed of that width, 50 feet, will be ample for an ordinary family requiring about one pound of seed. It will require about three years from the time of sowing until the bed is in full bearing, but once established, it is good for twenty years. It should be sown in drills one foot apart, and when the plants are four or five inches high they should be thinned out so that the plants will be nine inches apart from each other in all the rows. Great care must be taken for the first year to keep down all weeds as soon as they appear, else they will choke and destroy the young seedling Asparagus. The deeper the soil and the more manure used, the greater will be the crop.

Asparagus Roots

A saving of one or two years is effected by planting roots. These offered below are strong, two-year-old roots, and the proper size for testing. These roots are not carried in stock but will be shipped direct from the growers. Prices on the following varieties will be quoted on application.

Columbia, Mammoth White, Conover's Colossal, Barr's Mammoth and Palmetto.

BEANS

Dwarf or Bush

German,—Bohnen French,—Haricot
Spanish,—Frijole nano

Two pounds to 100 feet in drills or 150 hills; two bushels to the acre in drills.

A succession of sowing can be made from the first week in May until August. Plant in drills about two inches deep, and from eighteen inches to two feet apart, according to the richness of the soil; the poorer the soil the closer they can be planted. The seeds should be dropped about two inches apart.

Add .08 per Lb.; each additional pound add .01 if to be sent by mail.

French,—Asperge.

One ounce for 60 feet of drill.

Conover's Colossal. The best known and one of the most desirable sorts.

Pkt., .10; oz., .20; 1-4 lb., .60

Palmetto. Shoots are very large and light green, also tender and very desirable for the market and home garden. Very quick in growth, with close, round-topped shoots.

Pkt., .10; oz., .20; 1-4 lb., .60

Improved Golden Wax Beans

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

Black German Wax. (Black Seed.) Very early; round, yellow pods; a well-known standard sort.

Pound, .30; Two Pounds, .50; Fifteen Pounds, \$3.00

Curries' Rust-proof Wax. Pods long, flat and straight, very productive and rust-proof; black seed.

Pound, .30; Two Pounds, .50; Fifteen Pounds, \$3.00

Improved Golden Wax. Rust proof. An improvement on the old Golden Wax. The pod is somewhat round, meaty and entirely rust-proof.

Pound, .30; Two Pounds, .50; Fifteen Pounds, \$3.00

Green Pod Varieties

Stringless Green Pod. The pods are green, not quite as round as Valentine and less curved. The pods are stringless—absolutely—this quality at once placing the variety at top of the list among table beans.

Pound, .30; Two Pounds, .50; Fifteen Pounds, \$3.00

Long Yellow Six Weeks. Pods are long, flat, straight green.

Pound, .30; Two Pounds, .50; Fifteen Pounds, \$3.00

Low's Champion. Very productive, with stringless, large flat green pods. Excellent either as a string or shell bean.

Pound, .25; Two Pounds, .40; Fifteen Pounds, \$2.50

Dwarf Horticultural. Pods are of medium length, slightly curved, and when nearly developed are freely splashed with bright red on the yellow skin. The green shell beans are of good size, tender, and of fine flavor.

Pound, .30; Two Pounds, .50; Fifteen Pounds, \$3.00

Burpee's Bush Lima. The only Bush form of the true large Lima. Bushes grow to eighteen inches in height and always erect.

Pound, .30; Two Pounds, .50; Fifteen Pounds, \$3.50

Pole or Running

German,—Stangen Bohnen Spanish,—Judías

French,—Haricot a Rames

One Pound to 150 hills

These are more tender and require rather more care in culture than the Bush Beans, and should be sown two weeks later. They succeed best in sand loam, which should be liberally enriched with short manure in the hills, which are formed, according to the variety, from three to four feet apart. From five to six seeds are planted in each hill, about two inches deep.

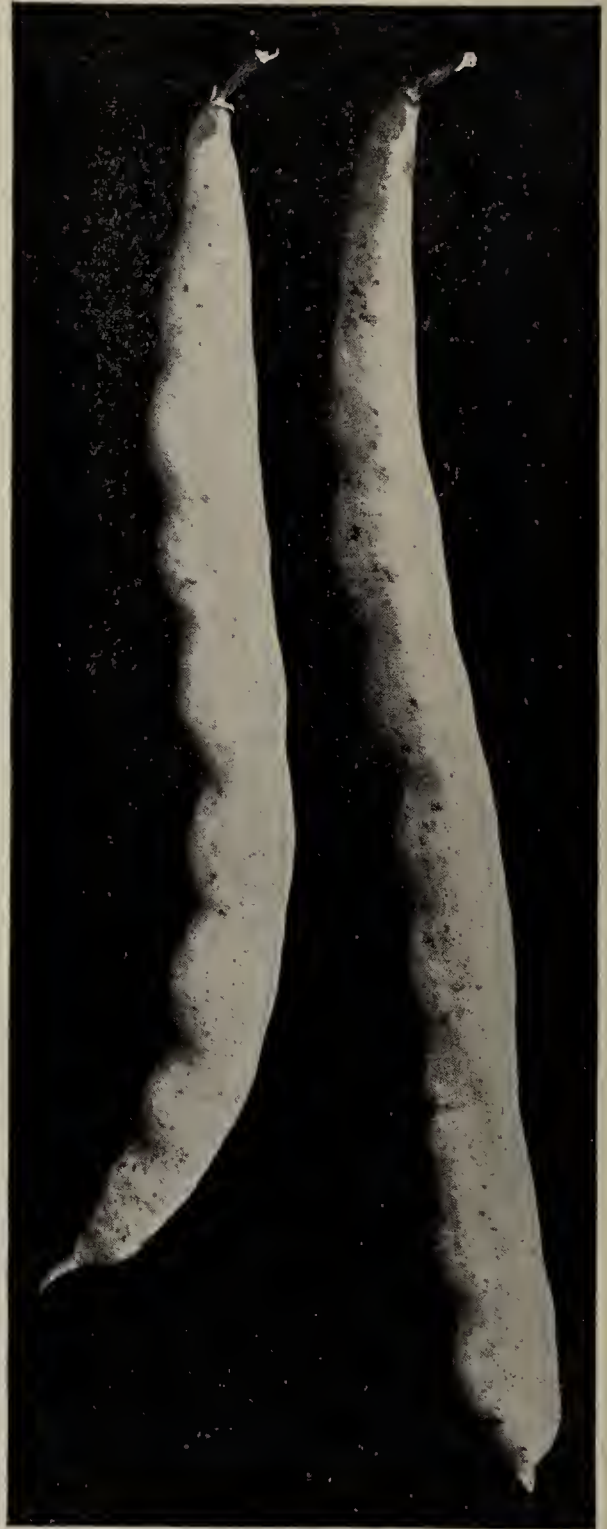

Rough cedar or similar poles about seven or eight feet long should be used for these to climb on. The poles should be set in the ground at least eighteen inches, so as to prevent being blown over.

Add .08 per Lb.; each additional pound add .01 if to be sent by mail.

Kentucky Wonder Wax. Similar to the green pod Kentucky Wonder. Pods 8 to 9 inches long. Very early. Pkt., .20; Pound, .30; Two Pounds, .50

Lazy Wife. One of the best of the later green-podded pole beans for snaps. The pods borne in large

clusters, are five to seven inches long, broad, thick, fleshy and entirely stringless. When young they have a rich, buttery flavor, which is retained until they are nearly ripe. The dry beans are excellent for winter use. Seed white. Pound, .30; Two Pounds, .50

Kentucky Wonder

Kentucky Wonder. An excellent green podded variety; enormously productive, the long pods hanging in great clusters along the entire vine. Seed dark brown; entirely stringless.

Pkt., .20; Pound, .30; Two Pounds, .50

Lima, King of the Garden. Heavy cropper—bean and pod very large. Pound, .30; Two Pounds, .50

BEANS (Continued)

Scarlet Runners. Usually cultivated for the beauty of its scarlet flowers. Pkt., .15; ½ Lb., .25

King Horticultural, or Old Fashioned Speckled Cranberry. Pods bright carmine color; both beans and pods are much larger than the common kind.

Pkt., .20; Pound, .30; Two Pounds, .50

Improved Yellow-eye Bean. A fine field bean and very productive.

Old-fashioned Yellow-eye Bean. An excellent field bean and much preferred to the Improved Yellow-eye as a baking bean.

Red Kidney Bean. An easily raised bean and very productive. Also greatly prized by many for baking.

Pea Beans. Native grown. Used for baking more than any other pea bean.

Sulphur Pea. Larger than the white pea bean; golden yellow color; early and of fine quality.

White Kidney Bean. Good yielder. Almost entirely free from rust. One of the best baking beans on the market.

Soldier Bean. Similar in shape to the White Kidney but much larger, and with brown markings. Excellent cropper and free from rust.

PRICES ON ABOVE ON APPLICATION

BEET

German,—Runtel Rube French,—Betterave
Spanish,—Beteraga

A rather light soil, well enriched, is best suited to the cultivation of the various beets. The mangels and sugar beets in particular, require very liberal manuring. For an early crop of table beets, sow the seed as early as the ground is in condition to work; light frosts will not injure the young plants. For a main crop, sow the first of May; and for winter beets, the last of June. Sow in drills, 12 to 15 inches apart, and about one inch deep, pressing the earth firmly upon the seed,—a very important matter. Use about six pounds of seed per acre, 1 oz., 50 feet. Thin out when the plants are large enough. The varieties for table use should be left three or four inches apart.

TABLE BEETS

Crosby's Egyptian. This variety is as early as the original Egyptian, but by careful selection has been made thicker and of better quality.

Pkt., .10; oz., .15; ¼ lb., .40

Dewing's Early. Of deep red color, smooth and of fine form. One of the leading varieties, both for market and for family use.

Pkt., .10; oz., .15; ¼ lb., .40

Detroit Dark Red Turnip. An excellent beet for bunching for market; tops exceptionally small and upright; roots turnip shaped with small tap root. Color of skin dark blood red; flesh bright red. Quality is of the best, sweet and tender. One of the best varieties for the market gardener and the home garden.

Pkt., .10; oz., .15; ¼ lb., .40

Early Eclipse. Very early, dark-red color, small top, and free from fibrous roots.

Pkt., .10; oz., .15; ¼ lb., .40

Edmand's. This variety is thoroughly fixed and uniform in type. The flesh is deep blood red in color, and exceedingly sweet and tender. It is round, smooth, of good market size, and does not grow over-large.

Pkt., .10; oz., .15; ¼ lb., .40

Haskell's Special Blood Turnip. We have a very fine strain of Blood Turnip Beet, of the Edmand's type. Very deep red fleshed so much in demand in all markets.

Pkt., .10; oz., .15; ¼ lb., .40

Swiss Chard or Silver Sea Kale. Used as greens and the ribs of leaves cooked and served as asparagus.

Pkt., .10; oz., .15; ¼ lb., .40

MANGEL-WURZEL AND SUGAR BEETS

Sow in April or May, using eight to twelve pounds to the acre.

Price of all varieties. Oz., .10; ¼ lb., .25; lb., .75

BEETS (Continued)

Improved Mammoth Long Red. An improvement on the old variety. The roots are very large, uniformly straight and well formed; proportionately thicker, and are deeper colored than the common sort, and with smaller tops.

Golden Tankard. Flesh a deep, rich yellow; very sweet and nutritious. Half long in shape. A very heavy cropper.

Norbiton Giant. A mammoth, long-red variety, enormously productive, and keeps well; good for deep soils.

Lane's White Sugar. One of the best for feeding stock. Very sweet.

Mangel Danish Sludstrup. Long, reddish yellow. Grows well above the ground and easy to pull. More percentage of dry matter than in any known Mangel. Very heavy cropper.

CABBAGE

German,—Kopf-Kohl French,—Chou Pomme
One ounce of seed produces about 3,000 plants.

Early varieties are grown from seed sown in hot-beds in February or March, only moderate bottom heat being required. Transplant into other frames

Danish Ball Head Cabbage

without much, if any, bottom heat, as soon as the plants show the fourth leaf. In April, or as soon as the ground can be easily worked, set out in rows three feet apart, and about eighteen inches between the

plants. The ground should be thoroughly stirred with cultivator and hoed every week till the plants cover the ground. For a fall crop, sow in the open

Chinese Cabbage

ground in May, in hills the proper distance apart, using a liberal quantity of manure in the hill, besides that which is plowed in; thin out to one good plant in each hill. In the same way crops may be sown to lay in for winter use, planting seeds as late as July 1. Seeds can also be sown in shallow drills; when the plants are large enough, can be transplanted, setting the plants in rows three feet apart and two feet apart in the row. If the young plants are troubled with the cabbage fly, sprinkle them with tobacco dust, air-slaked lime, slug-shot or wood ashes, while the dew is on them.

Chinese Cabbage (Chihli). Earliest and most sure heading of the Chinese varieties. Produces long, solid white heads nearly two feet in length.

Pkt., .10; oz., .40; ¼ lb., \$1.50

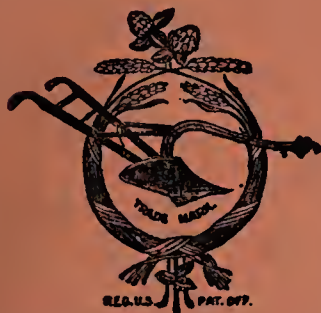

Danish Ball Head. The wide and unfailing popularity of the Danish Ball Head cabbage is simply wonderful. It seems to adapt itself to all soils and conditions.

It is a medium to late cabbage, but is generally grown as a late crop. It is sure to head, the heads being round, hard and extremely heavy, though not

CABBAGE (Continued)

extra large. It can be grown in close quarters, on account of its compact habit.

Pkt., .10; oz., .35; ¼ lb., \$1.50

All Seasons. An early Drumhead, sure heading, solid variety. Desirable for early or fall use.

Pkt., .10; oz., .35; ¼ lb., \$1.25

Copenhagen Market. Extra early variety, ball shaped and evenly maturing. Best for market gardeners.

Pkt., .10; oz., .35; ¼ lb., \$1.50

Charleston Wakefield. Grows to a much larger size than the Jersey Wakefield. Very productive and good shipping variety.

Pkt., .10; oz., .35; ¼ lb., \$1.25

Early Jersey Wakefield. A standard early variety for home use or market.

Pkt., .10; oz., .35; ¼ lb., \$1.25

Early Winningstadt. An early variety of excellent quality, not as early as the Wakefield.

Pkt., .10; oz., .35; ¼ lb., \$1.25

Enkhuizen Glory. It is an early cabbage, but still of large size, solid and of the best quality. The plants are compact, have few outside leaves, can be planted close together, and will produce a very large crop.

Pkt., .10; oz., .35; ¼ lb., \$1.50

Golden Acre. An early Roundhead variety. Heads medium size. Very solid and of excellent quality.

Pkt., .10; oz., .50; ¼ lb., \$2.00

Henderson's Early Summer. A standard summer variety. We have the true stock.

Pkt., .10; oz., .35; ¼ lb., \$1.25

Mammoth Rock Red. The largest heading of any of the red sorts, of deep rich color, and excellent quality.

Pkt., .10; oz., .35; ¼ lb., \$1.25

Red Dutch for pickling or for salads.

Pkt., .10; oz., .35; ¼ lb., \$1.25

Savoy Improved American. The finest flavored of all the cabbage family, large and solid.

Pkt., .10; oz., .35; ¼ lb., \$1.25

Succession. A sure-headed, long-keeping variety, very similar to All Seasons, but maturing a little later. Heads deep and very firm.

Pkt., .10; oz., .35; ¼ lb., \$1.25

Sure Head. A fine variety for main crop. A good shipper and sure header.

Pkt., .10; oz., .35; ¼ lb., \$1.25

Warren's Stone Mason. An improvement on the Stone Mason Drumhead; heads rounder, firmer and earlier; is an extra good keeper.

Pkt., .10; oz., .35; ¼ lb., \$1.25

BROCCOLI

A vegetable similar in habit to the cauliflower. It is getting to be a very popular vegetable. In cooking it is treated the same as spinach.

Italian Green Sprouting. This variety has a central head. When this is cut the side branches produce small, compact flower clusters.

Pkt., .20; oz., \$1.50

BRUSSELS SPROUTS

(Species of cabbage; cultivation the same)

German,—Rofen-Kohl French,—Chou de Bruxelles

Spanish,—Berza de Brussels

One ounce will sow a bed of forty square feet, and produce about 3,000 plants

This is a delicious vegetable, superior to either borecole or spinach. The small, cabbage-like heads which grow upon the stem are much improved by a moderate frost. Sow in hotbeds in March or April, and in the open ground in May.

Dwarf Improved. Produces excellent, compact sprouts; very sure cropper.

Pkt., .10; oz., .20; ¼ lb., .75

CAULIFLOWER

German,—Blumenkohl

Spanish,—Coliflor

French,—Chou-fleur

One ounce of seed will produce 1,500 to 2,000 plants if sown in open ground, or about 3,000 in frames

To raise good Cauliflower there is nothing so essential to success as good seed. The best Cauliflower seed is very expensive, but it is worth to the grower ten times as much as cheap and carelessly grown seeds. The best results are obtained from using Snowball for main late crop, as well as for early use.

The seed should be sown in open ground or cold frames about the middle of May or first of June, on good soil. When plants are large enough, transplant to rich, moist soil. These remarks refer to Snowball for main late crop, as well as for early use.

Henderson's Early Snowball. This is undoubtedly the finest ever introduced. It is the earliest and produces beautiful snow-white heads of the most delicious flavor. The seed we offer is pure and genuine, and sure to prove satisfactory.

Pkt., .20; oz., \$2.50

Extra Selected Dwarf Early Erfurt. The finest strain of the Erfurt Cauliflower; almost as early as the Snowball; grows about 15 inches high; producing very solid, pure white heads of the very finest quality; seldom fails to form a good sized head.

Pkt., .20; oz., \$2.50

All kinds of Insecticides. Spray Pumps, Power Sprayers, etc., always on hand. Call and examine or write for catalogue and prices.

CARROT

German,—Rhore French,—Carrotte
Spanish,—Zanahoria

One ounce will sow 100 feet of drill; 3 pounds required for an acre

Carrots require a very finely pulverized soil to grow them to perfection. A good, light and well-enriched sandy loam is the best for this crop. For field culture, sow in drills 2 ½ feet apart, so as to cultivate by horse. Market gardeners sow in drills about 15 inches apart and cultivate by hand. For early crops cover ½ inch deep, and thin to 6 inches apart in the rows; for late, cover ¾ inch deep, and thin to 4 inches.

Danvers Half-Long. One of the heaviest croppers; roots dark orange color, 8 to 10 inches in length, and ending in a somewhat abrupt point; first class for all soils. Pkt., .10; oz., .20; ¼ lb., .60

Oxheart, or Guerande. Roots short and very thick, and intermediate between Scarlet Horn and Chantenay; color deep orange; fine grained. Pkt., .10; oz., .20; ¼ lb., .60

Improved Long Orange. The best known and most largely cultivated of any Carrot; excellent for stock or table use. Roots deep orange, 12 to 15 inches long. Pkt., .10; oz., .20; ¼ lb., .60

Hutchinson. Very productive. Roots nearly cylindrical in form, 10 to 12 inches in length and ending in an abrupt stump root. Largely grown in New England. Pkt., .10; oz., .20; ¼ lb., .60

Chantenay. One of the best varieties for the market or home garden. Our seed is of the coreless type with a reddish center. It is half long and stump rooted and grows from 6 to 7 inches long. Pkt., .10; oz., .20; ¼ lb., .60

Cress or Peppergrass

German,—Areffe French,—Cresson
Spanish,—Masuerzo

One ounce will sow 16 square feet, or 150 feet of drill

A popular salad, which should be sown early in the spring—very thickly in shallow drills—and at short intervals, for success, as it soon runs to seed.

Extra Curled. A small plant, having a fine pungent flavor, and used as a salad; may be cut two or three times. Pkt., .10; oz., .15; ¼ lb., .35

True Water Cress. Grows along the banks of ponds and streams, and is easily introduced, wholly unlike Extra Curled; leaves are quite large and thick; a fine salad, sold in immense quantities in the large markets in spring. Pkt., .10; oz., .60; ¼ lb., \$1.25

Danvers Half-Long Carrot

CELERY

German,—Sellerie French,—Celeri Spanish,—Aplo

One ounce will produce 3,000 plants

Sow seed the first or second week in April in hotbed or cold frame. As soon as the plants have attained a height of three inches transplant, setting them four inches apart. As fall approaches draw earth up to the plants, keeping the stalks well together. When well blanched it is ready for use. Some of the varieties, such as Golden Self-Blanching and White Plume, may be blanched by simply placing a board 12 to 15 inches wide on edge on each side of the row.

Giant Pascal. A strong grower and wonderful keeper. Quality very fine. Pkt., .10; oz., .50

Golden Self-Blanching. A self-blanching early golden-colored variety that is very popular. Pkt., .10; oz., .75

White Plume. A variety that can be more easily grown than any other, as it does not require high banking to blanch the stalks. Simply earthing up enough to keep the stalks together or by passing a string around each plant is sufficient. Pkt., .10; oz., .50

CHERVIL

One ounce will sow about 300 feet of drill

Cultivated like parsley. Sow thickly in May, in drills half an inch deep, one foot apart. Use while the leaves are young and tender.

Curled Chervil. The young leaves are used for garnishing, and flavoring soups.

Pkt., .10; oz., .20; ¼ lb., .45

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

CORN - Sugar

German,—Welfchkorn Spanish,—Maiz French,—Mais
One Half Pound will plant 50 hills; 12 Pounds will
plant one acre in hills

Corn requires a good soil and a warm situation. Commence for first early by planting the early varieties about May 1, and if a continuous supply is wanted all summer, make plantings about two weeks apart from May 1 until the last of July, first planting early varieties, then later ones. Plant in rows 3 feet apart, and make the hills about the same distance apart in the rows. Five kernels in the hills are plenty. Cover about 1 inch deep for early and a little deeper for late. Thin to 3 plants in a hill. Add 6 cents per lb. and for each additional lb. to the same address add 1c, if to be sent by mail.

Crosby's Early. An early corn of large size and choice quality. It has long been a standard variety.

1/2 lb., .15; 1 lb., .25; 2 lbs., .45; 12 lbs., \$2.50

Early Red Cory. This variety is the favorite for first early.

1/2 lb., .15; 1 lb., .25; 2 lbs., .45; 12 lbs., \$2.50

White Cob Cory. This is an improvement over the Early Cory as the cob is white, which gives it a finer appearance. It is as early as the Early Cory and of excellent quality.

1/2 lb., .15; 1 lb., .25; 2 lbs., .45; 12 lbs., \$2.50

Golden Bantam. The fact that the grains of this variety are yellow is an indication of hardiness and its value for early planting and early maturity. It is a rapid grower, and produces ears measuring about 5 inches, but the smallness of ears is fully made up by the deliciously sweet flavor and tender quality of the corn when cooked. It is a fine variety for the home garden. 1/2 lb., .15; 1 lb., .25; 2 lbs., .45; 12 lbs., \$2.50

Golden Sunshine. The earliest of yellow sweet corn varieties. Very fine quality. Ears 6 inches long with 12 rows of large kernels. About 10 days earlier than Golden Bantam.

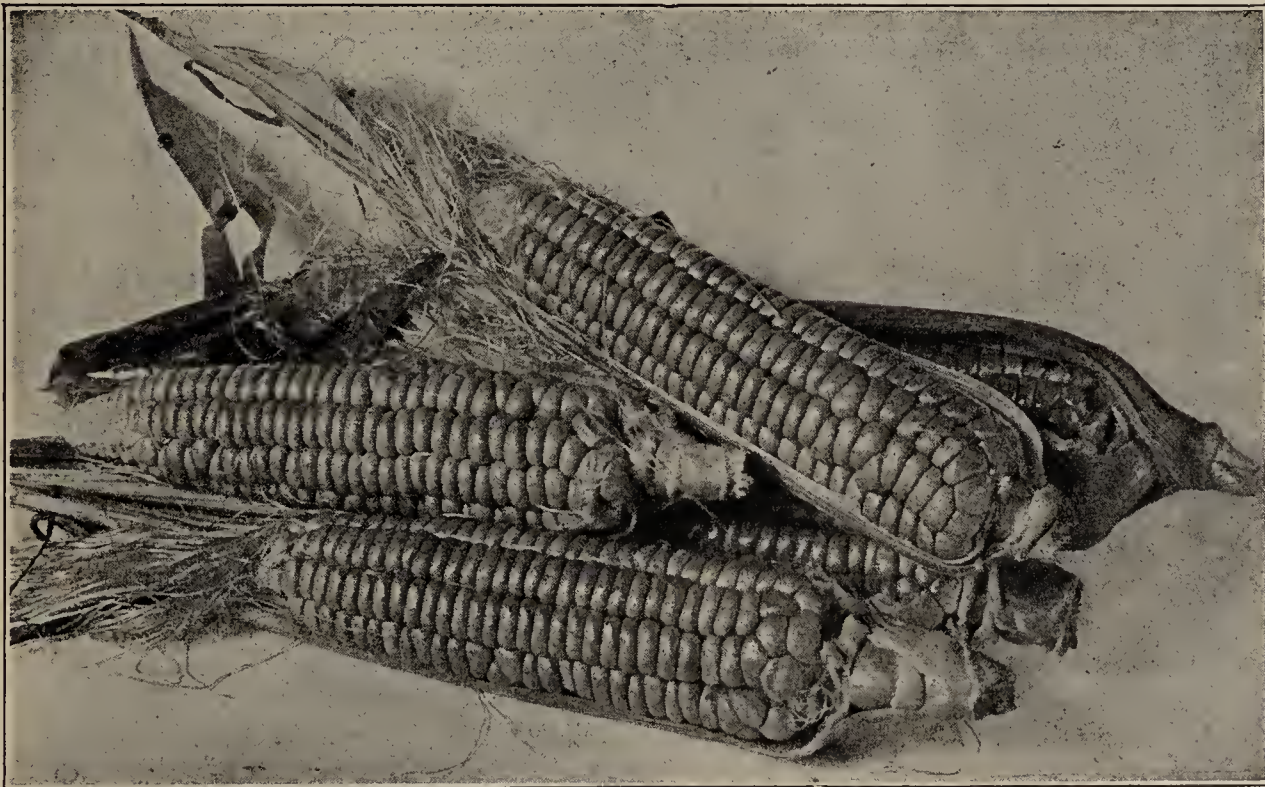

1/2 lb., .15; 1 lb., .25; 2 lbs., .45; 12 lbs., \$2.50

Bantam Evergreen. Later than the Golden Bantam. Ears 8 inches long. 12 to 14 rowed. Of a rich golden yellow color and fine quality.

1/2 lb., .15; 1 lb., .25; 2 lbs., .45; 12 lbs., \$2.50

Black Mexican. This corn when in condition for the table cooks remarkably white; but the ripe grain is black or bluish-black. It is surpassed by none in tenderness.

1/2 lb., .15; 1 lb., .25; 2 lbs., .45; 12 lbs., \$2.50

Golden Bantam

FIELD AND FODDER CORN

Prices will be quoted on application on the following corns. Please give the amount desired as well as the kind in all cases.

Leaming. An early, very heavy, long-eared corn. Grows to medium height with large amount of foliage.

One of the best ensilage corns, very much relished by stock. Cob red, grain yellow.

Red Cob. A very large-growing white dent corn, with red cob. Fodder sweet, juicy and tender. Very popular in northern dairy districts.

Eureka. One of the tallest and best ensilage corns grown. Grows very tall and is very productive of ears and leaves. For the silo this corn is rarely equalled.

CORN (Continued)

Sanford. A well-known variety, adapted to the whole of New England. Kernels silvery white flint color; large and broad. An excellent fodder and ensilage corn.

Early Canada. An eight-rowed, yellow flint variety with small cob and deep grain. This is one of the

earliest and best and seldom fails to produce a crop. The Early Canada seed we have to offer was grown in this State.

Prizetaker. A very large growing, yellow flint corn. Ears are eight-rowed, long, and the kernels deep and broad. One of the very best for ensilage as it ears out well.

White Spine Cucumber

CUCUMBER

German,—Gurfe

French,—Concombre

Spanish,—Pepino

One ounce will plant 50 hills; 2 pounds will plant an acre

Cucumbers being a tender annual should not be planted out of doors until all danger from frost is passed and the ground is warm. They succeed best in warm, moist, rich loamy soil. The hills should be 3 to 4 feet apart and the plants thinned to four of the strongest to a hill.

Extra Early Russian. Earliest variety known; hardy and productive. Fruit very small and quality fine for pickling and slicing.

Pkt., .10; oz., .25; ¼ lb., .75

Early Cluster. Fruit borne in pairs; light green; a great bearer.

Pkt., .10; oz., .25; ¼ lb., .75

Boston Pickling. Fruit short, smooth and pointed at each end, bright green and a great yielder; one of the best pickling.

Pkt., .10; oz., .25; ¼ lb., .75

Early Fortune. An early variety, very productive, and of large size. Dark green in color which does not fade. The shape is uniform and the quality very fine.

Pkt., .10; oz., .25; ¼ lb., .75

White Spine Improved. The most popular strain of White Spine, and for general out-door culture, the best.

Pkt., .10; oz., .25; ¼ lb., .75

Long Green Improved. Fine for pickling when small; good for table use when about half grown.

Pkt., .10; oz., .25; ¼ lb., .75

Japanese Climbing. Vines are extra strong and foliage much more vigorous than other kinds, and being a climbing sort, can be grown on trellises, etc., saving much valuable space in small gardens. It is very prolific, from forty to fifty cucumbers having been counted on single plants. Fruit cylindrical, about ten inches long, thick and of fine flavor.

Pkt., .10; oz., .25; ¼ lb., .75

Davis Perfect. Long and slim. Sometimes measuring 12 inches in length. Very tender and of fine quality.

Pkt., .10; oz., .25; ¼ lb., .75

Longfellow. Very dark green, long and straight. Fine for shipping. Length from 12 to 14 inches.

Pkt., .10; oz., .25; ¼ lb., .75

DANDELION

German,—Lowenzahn French,—Pissenlit
Spanish,—Amargon

One ounce will sow 100 feet of drill

The Dandelion resembles endive, and affords one of the earliest as well as one of the most healthful spring greens. Sow as early as the weather will permit, in good, well-enriched soil, in rows 12 inches apart, covering seed $\frac{1}{4}$ of an inch deep, and firming the soil well over them. Thin to two or three inches apart in the rows; by so doing the roots will be larger and a great amount of time will be saved the next spring in trimming or gathering the crop. One pound per acre is sufficient.

Improved Thick-Leaved. Cultivate for spring greens; an immense improvement on the common dandelion, both in size and thickness of its leaves and fine flavor, being far less bitter. Pkt., .10; oz., .75; $\frac{1}{4}$ lb., \$2.50

EGGPLANT

German,—Gierpanze French,—Aubergine
Spanish,—Berengena

The Eggplant will thrive well in any good garden soil, but will repay good treatment. The seeds should be sown in hotbed or warm greenhouse in March or

Kale

April, and when about an inch high potted in two-inch pots. Plant about June 1, two and one-half feet apart.

New York Improved Purple. The leading market variety, and undoubtedly the best for size, quality and productiveness. Pkt., .10; oz., .60

ENDIVE

German,—Gendive French,—Chicoree
Spanish,—Endivia

Endive

One of the most refreshing and attractive of all autumn and winter salads. Sow seed from the middle of June until the end of August.

Moss Curled. More finely curled, and a heavier and more dense plant than Green Curled.

Pkt. .10; oz., .20; $\frac{1}{4}$ lb., .75

Broad-leaved Batavian (Escarolie). This variety is chiefly used in soups and stews; requires to be tied up in blanching.

Pkt., .10; oz., .20; $\frac{1}{4}$ lb., .75

KALE or BORECOLE

German,—Blatter-Kohl French,—Chou Vert
Spanish,—Breton

One ounce will produce 3,000 plants

Sow from the middle of April to the beginning of May in prepared beds; transplant in June, and treat in the same manner as for cabbage. Of all the cabbage tribe this is the most tender and delicate. The varieties are all extremely hardy, and are best when touched by frost.

Tall Curled Scotch. Plants of this variety grow two to three feet in height, bearing long, plume-like, light green leaves which are much cut and deeply curled at the edges. Very hardy.

Pkt., .10; oz., .20; $\frac{1}{4}$ lb., .75

Dwarf Green Curled Scotch. Rarely exceeding 18 inches in height, but spreading out under good cultivation to 3 feet in diameter; leaves beautifully curled and bright green.

Pkt., .10; oz., .20; $\frac{1}{4}$ lb., .75

KOHL RABI

German,—Rohl-Rab French,—Chou-Rave
Spanish,—Col de nabo

One ounce will sow 200 feet of drill

This vegetable, the popularity of which is rapidly increasing, combines the virtues of the turnip and cabbage, but excels both in nutritive, hardy and productive qualities. The seed may be sown in June in rows 18 inches apart, and the plants thinned out to eight or ten inches in the rows.

Purple Vienna. A little later than the White; color bluish purple. Pkt., .10; oz., .25; ¼ lb., .75

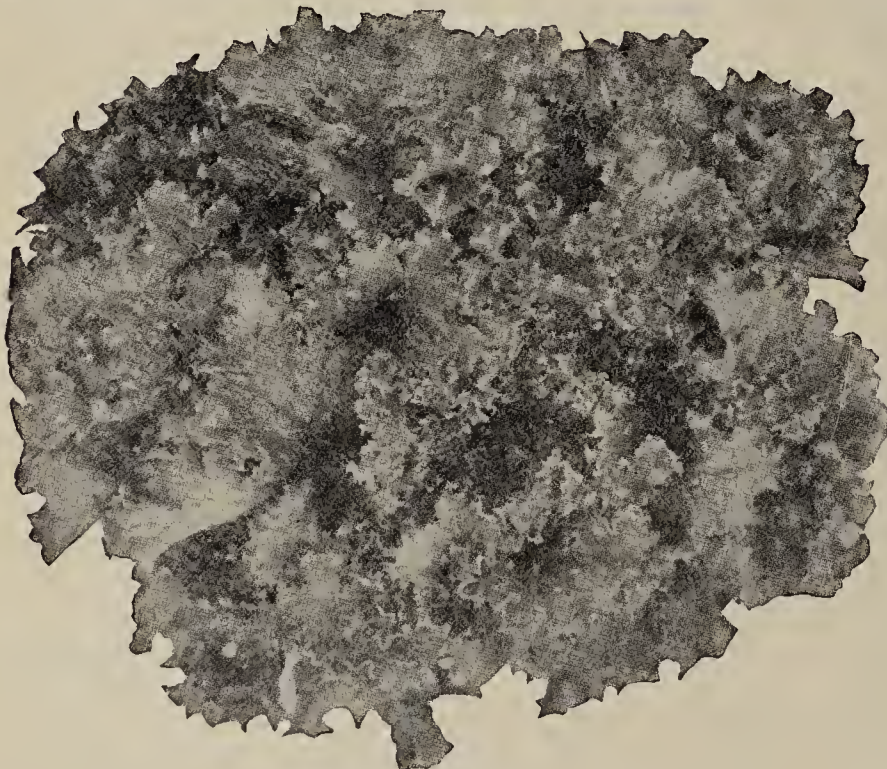

Large Green or White. Good for table and also for feeding stock. Pkt., .10; oz., .25; ¼ lb., .75

LETTUCE

German,—Lattich French,—Laitue
Spanish,—Lechnga

One ounce will sow 120 feet of drill

Requires a rich, moist soil, and to be crisp and tender needs to be grown in cool weather. For winter use, sow in hotbeds every two weeks, at the rate of one ounce of seed to four sashes (a sash is three feet long by six feet wide); cover very lightly, and transplant, first to three inches apart each way, afterward to eight inches. For garden or field, sow in rows, cover one-fourth of an inch deep and thin out to 12 inches apart in the rows. For New England the White Seeded Tennisball for cultivation under glass, and the Black Seeded Tennisball for outdoor use are the standard varieties.

Grand Rapids

Grand Rapids. An excellent forcing variety with loose heads and of good size and form.

Pkt., .10; oz., .20; ¼ lb., .60

Big Boston. A most desirable variety, either for forcing in cold frames or open ground planting; always produces large, solid, saleable heads.

Pkt., .10; oz., .20; ¼ lb., .60

May King

May King. Probably the finest all-seasons lettuce yet introduced. It is very early and hardy, and will stand cold, damp weather better than many varieties. Planted out of doors or under glass it will produce fine solid heads much sooner than any other variety. Outer leaves are yellowish green, tinged with brown, while the inside is a rich yellow.

Pkt., .10; oz., .20; ¼ lb., .60

Boston Curled. Of ordinary quality but great beauty; highly ornamental in growth with its frilled leaves.

Pkt., .10; oz., .20; ¼ lb., .60

Prize-Head Early. Leaves green and red, very thin, crisp and tender. One of the best for private use.

Pkt., .10; oz., .20; ¼ lb., .60

Tennisball, Black-Seeded. A very popular sort for open-ground culture; forms a handsome head, and is crisp and tender.

Pkt., .10; oz., .20; ¼ lb., .60

Simpson Early Curled (White Seed). A leading early sort for forcing or open ground.

Pkt., .10; oz., .20; ¼ lb., .60

Tomhannock. A variety with upright leaves, beautifully wrinkled, edges of outer leaves have reddish tinge; one of the best.

Pkt., .10; oz., .20; ¼ lb., .60

Iceberg. A large, late, cabbage heading variety. Heads very firm and well blanched. Color, medium green.

Pkt., .10; oz., .20; ¼ lb., .60

Hanson. Large, solid heads; tender, crisp and of a fine flavor.

Pkt., .10; oz., .20; ¼ lb., .60

Use one of our Garden Seeders and save seed,
get a more uniform growth and larger crops.

LEEK

German,—Lanch French,—Poireau
Spanish,—Puerro

One ounce will plant 200 feet of drill

The leek is very hardy and easily cultivated; it succeeds best in a light but well-enriched soil. Sow as early in the spring as practical in drills one inch deep and one foot apart. When six or eight inches high they may be transplanted in rows ten inches apart each way as deep as possible, that the neck, being covered, may be blanched.

American Flag Pkt., .10; oz., .25; ¼ lb., .75

Musk Melon

MELON, MUSK

German,—Melone French,—Melon
Spanish,—Melon

One ounce will plant about 50 hills (2 to 3 pounds in hills) per acre

Melons thrive best in a light, rich soil. Plant early in May, when the ground has become warm and dry, in hills six feet apart each way for Muskmelons; eight feet for Watermelons. Previous to sowing the seed mix a few shovelfuls of well-rotted manure in each hill, and plant in each twelve to fifteen seeds; after all danger of bugs is over, thin out to three plants per hill. When about one foot long, pinch off the tips to make them branch, as it strengthens the growth of the vines and makes the fruit mature earlier. Feed liquid manure occasionally. A few hills for early use may be had by sowing on pieces of sod in a hotbed, and when warm enough transplant to open ground.

Emerald Gem Melon. The Emerald Gem is entirely unlike any other muskmelon yet introduced. The melons are about the size of the Netted Gem, but un-

like that variety, the skin, while ribbed, is perfectly smooth, and of very deep emerald green color. The flesh which is thicker than any other native melon of the size, is of a suffused salmon color, and ripens thoroughly to the thin green rind, which is distinctly defined. The flesh is peculiarly crystalline in appearance, and so very juicy, sweet and rich that it almost drops to pieces. It matures very early and is quite productive.

Pkt., .10; oz., .20; ¼ lb., .50

Long Yellow Musk. A long, large melon with a musky flavor; rich, yellow color, both inside and out.

Pkt., .10; oz., .20; ¼ lb., .50

Rocky Ford. This new Muskmelon is similar to the royal strain of Netted Gem. The strain here offered originated with the melon growers in the vicinity of Rocky Ford, Col., who have shipped this melon from that distant Western point to Eastern markets

Pkt., .10; oz., .20; ¼ lb., .50

Bender's Surprise. A delicious medium sized melon. Slightly oblong in shape. Deeply ribbed. Flesh thick, solid and juicy, and of a deep salmon color.

Pkt., .10; oz., .20; ¼ lb., .50

Early Hackensack. An improvement over the old Hackensack, producing melons of as good quality and ten days earlier. Large fruit with thick, green flesh of the finest flavor.

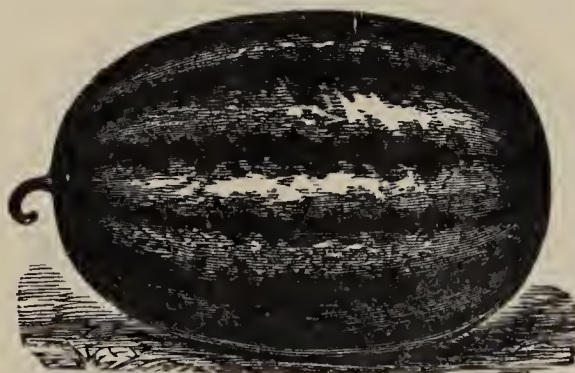

Pkt., .10; oz., .20; ¼ lb., .50

MELON, WATER

German,—Waffermelone Spanish,—Zandia
French,—Melon d'Eau
One ounce will plant 50 hills

Prices on all varieties of Watermelons as follows:
.10 per pkt.; .15 per oz.; ¼ lb., .40.

Cole's Early. An excellent variety. One of the earliest. Hardy, medium size, nearly round, dark green, striped a lighter shade; flesh deep pink.

Phinney's Early. This is another early melon of fine quality; suitable for growing in New England. Medium size, oblong in form, mottled green; flesh bright scarlet and very sweet.

Citron for Preserves. The old and well-known Preserving Citron; seeds red.

MUSTARD

German,—Senf

French,—Moutarde

Spanish,—Mostaza

One ounce will sow 75 feet of drill

As an ingredient, the green Mustard imparts a delightfully pungent flavor to the various forms of prepared salads. For early crops the seed may be sown in a hotbed in March, and for general crop at frequent intervals through the spring, in drills from eight to twelve inches apart.

White London. Considered the best for salads and spinach; leaves light green. It is best when about four inches high.

Oz., .10; ¼ lb., .15

ONION

German,—Zwiebel

French,—Ognon

Spanish,—Cabolla

Select the cleanest, richest land on the farm for the Onion crop. If onions were grown on the land the previous year, so much the better, but any good corn or potato land will do. Broadcast fifteen to twenty cords of fine, well-rotted manure to the acre and plow not deeper than six inches; harrow thoroughly, cross plow, and harrow again, after which hand rake with wood rake and remove stones and rubbish. Sow four to five pounds of seed per acre in drills twelve to fourteen inches apart and about one-half inch deep. See that the Seed Drill is equipped with a good roller that will

Yellow Globe Danvers

press the earth firmly upon the seed. Sow as early in the spring as the ground can be properly worked. There is seldom necessity for thinning Onions if the

land has been properly manured and seeded. After the Onions are three to four inches high, an application of about five hundred pounds to the acre of fertilizer, rich in available nitrogen, strewn between the rows, will be very beneficial. Keep the Onions growing by never allowing the weeds to get ahead and the acre should produce in a good average season, five hundred to seven hundred bushels. When the tops are down, the Onions may be pulled and left on the ground, and should be frequently turned with a wooden rake until tops are dried.

ONION SETS

Onion sets should be planted as early in the spring as convenient to obtain early green onions, but they may be set at any time up to June 1. Set in rows a foot apart and three to four inches between them in the row. Any good soil will suit them. When grown in quantities, high cultivation is given in order to forward the crop for an early market. They are ready for use as soon as the bulbs begin to be of fair size. Those not used in green condition will ripen early in July and make nice onions. Potato and Top onions are grown from bulbs only.

Potato Onion Sets.....	lb., .30; 8 lbs.,	\$1.75
Red Bottom Sets	lb., .30; 8 lbs.,	1.75
White Bottom Sets.....	lb., .30; 8 lbs.,	1.75
Yellow Bottom Sets	lb., .30; 8 lbs.,	1.75
Top Sets	lb., .30; 8 lbs.,	1.75

Yellow Globe Danvers. Undoubtedly the best known and most popular of all onions; the earliest yellow variety; is entirely free from stiff necks. Globular in shape; has a small top. It is the most productive onion grown.

Pkt., .10; oz., .40; ¼ lb., \$1.00

Large Red Wethersfield. We have a very fine and select strain of this sort. Color is deep purplish red, flesh white, moderately grained and very firm. Yields enormously and is one of the best winter keeping onions.

Pkt., .10; oz., .40; ¼ lb., \$1.00

White Portugal, or Silverskin. A large, flat, white onion of mild and pleasant flavor; hard and fine grained, and a good keeper. Extensively sown for sets, and is also largely grown for pickling.

Pkt., .10; oz., .40; ¼ lb., \$1.00

Prize-Taker. A globe-shaped variety of delicate straw color, growing to a very large size. It ripens up hard and firm, the flesh being pure white. Fine grained and of fine, mild, delicate flavor.

Pkt., .10; oz., .40; ¼ lb., \$1.00

Buy one of our Garden Seeders. You can save the price of it in one season in time and seed. It is the most economical of seeders made. Send for catalog and prices.

PEAS

German,—Erbren French,—Pois
Spanish,—Guizante

One pound for 50 feet of drill; one to
two bushels in drills for an acre

Peas come earliest to maturity in light, rich soil. For general crop, a deep loam or a soil strongly inclined to clay is best. For early crops decomposed leaves or leaf-mold should be used; or, if the soil is very poor, strong manure may be used. For general crops a good dressing should be applied, and for the dwarf-growing kinds the soil can hardly be too rich. When grown as a market crop, peas are never staked; for private use they are generally sown in double rows, and the tall varieties staked up by brush. For an early crop sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. After the first of June, sowing should be discontinued until the middle of August, when a good crop may sometimes be secured by sowing an extra-early sort for fall use.

If sent by mail add .08 per lb.; and for each additional lb. to the same address add .01.

All marked thus (*) indicate wrinkled varieties.

Extra Early Dwarf Varieties

***Notts Excelsior.** This is the earliest dwarf wrinkled pea. The plant is dwarf and needs no support. The pods are of good size and well filled with large peas of the finest quality. It is as early as the American Wonder, while the vines are much more productive and the pods of larger size. There is no better early dwarf pea. Fifteen inches.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Sutton's Excelsior.** Ripens early on vines fourteen to sixteen inches high, covered with a great abundance of long, straight, broad pods of a pale green color.

PriceLb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Laxtonian.** One of the best dwarf wrinkled peas for the market gardener. Pods about 4 inches long, resembling those of Gradus, but ripening a little earlier. Vines productive and vigorous; average height less than 18 inches. Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Pioneer.** An improvement on the popular Laxtonian. Vines about 20 inches high; color, light green.

Laxtonian

Vigorous growth. The pods pointed and a little darker in color than the vine. Considered fully four days earlier than the Laxtonian.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Blue Bantam.** A splendid large podded dwarf variety of the Laxtonian class. Vines about 15 inches high. Pods deep green, about 4 inches long. Fine quality.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Peter Pan.** One of the very finest of the large podded dwarf variety of the Laxtonian class, though somewhat earlier. Vines 15 inches. Pods straight and pointed. Quality best.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

Extra Early Variety Not Dwarf

Alaska. An extra early round pea bearing pods of a dark green color; two feet.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Gradus or Prosperity.** It combines the finest quality with extreme earliness, and is also productive, bearing pods fully as large as Telephone. The color of the shelled peas is a beautiful light green, which color they retain after being cooked; the quality and

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

PEAS (Continued)

flavor delicious, and the peas remain tender and sweet for a long time.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

Sutton's Excelsior

***World's Record.** An improved type of Gradus, being slightly earlier, more dwarf and very productive. Height, 2 feet. Pods medium green, 4 inches long. Very fine quality. Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Thomas Laxton.** One of the very best of the tall growing, large pod, early peas. The plant is a very hardy and strong grower, producing extra large pods in abundance. The quality is delicious and cannot be surpassed by any other variety. The "Thomas Laxton" will mature nearly as early as any of the extra early smooth peas, and being a wrinkled sort is much sweeter. Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Early Morn.** One of the earliest and most productive. The pods are very large and well filled. Very fine flavor. Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

Second Early Varieties

***Telephone.** A pea of the finest quality, sweet and delicious. Medium late, growing four feet tall with pods of the largest size.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Bliss Everbearing.** Medium late and very productive. Two feet tall.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

***Dwarf Telephone (Carter's Daisy).** Similar to the Tall Telephone except in the height of the vine, which is only about two feet.

Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

Late Variety for General Crop

***Champion of England.** The standard for quality. Grows four feet tall, very prolific, and still one of the best late peas. Lb., .30; 2 lbs., .50; 14 lbs., \$3.00

White Marrowfat. A good late sort. Cultivated very extensively for the summer crop.

Lb., .25; 2 lbs., .45; 15 lbs., \$2.40

Black-Eyed Marrowfat. An old and standard late variety for garden or field use.

Lb., .25; 2 lbs., .45; 15 lbs., \$2.40

Canada Field. Seeds small white; for field culture only; largely used for sowing among oats. Price

Lb., .10; 15 lbs., \$1.35

PUMPKIN

German,—Kurbis

French,—Potiron

Spanish,—Cabbage

One ounce will plant 20 hills

Pumpkins are grown chiefly as food for stock. The usual method of planting is to scatter a few seeds at

Sugar Pumpkin

intervals in the hills when planting Indian corn; in this way good crops of pumpkins are secured with

PUMPKINS (Continued)

slight labor and expense, and make a valuable addition to the season's crops.

Connecticut Field. The common yellow pumpkin grown chiefly for feeding stock.

Pkg., .10; oz., .15; ¼ lb., .30; lb., \$1.00

Sweet or Sugar. A small variety, fine-grained and sweet; the best for table use.

Pkg., .10; oz., .15; ¼ lb., .35; lb., \$1.25

Moss Curled

PARSLEY

German,—Peterfile

French,—Persie

Spanish,—Perejil

One ounce for 150 feet of drill

Parsley succeeds best in rich, mellow soil. As the seed germinates very slowly, it should be sown early in spring, previously soaking the seed for a few hours in tepid water. Sow thickly in rows a foot apart and half an inch deep.

Champion Moss Curled. The standard variety.

Pkt., .10; oz., .20; ¼ lb., .50

PARSNIP

German,—Pastinake

French,—Panais

Spanish,—Pastinaca

One ounce for 150 feet of drill; five pounds in drills for an acre

Sow in drills as early in spring as the weather will admit, fifteen inches apart, covering half an inch deep. When well up, thin out to five or six inches apart in the rows. Unlike carrots, they are improved by frost, and it is usual to take up in the fall a certain quantity for winter use, leaving the rest in the ground till spring, to be dug as required.

Prices on all varieties of parsnips as follows:

Pkt., .10; oz., .20; ¼ lb., .50; prices in quantity on application.

Abbott's Improved Hollow Crown. Smooth and quite large; fine sort.

Guernsey. Roots not quite so long as Hollow Crown, but of greater diameter and more easily gathered.

Long Smooth. As name implies, very smooth, free from roots, and a general favorite.

PEPPER

German,—Pfeffer

French,—Piment

Spanish,—Pimiento

One ounce will produce 2,000 plants

Grown largely for pickles. Sow in hotbeds early in April, and transplant to the open ground when the weather is favorable. They should be planted in warm, mellow soil in rows 18 inches apart. They may also be sown in the open ground when danger of frost is past.

Large Bell, or Bull Nose. A favorite and well-known pickling sort. Is early, large, mild and thick skinned.

Pkt., .10; oz., .50

Long Red Cayenne. A small, long, bright red sort, very productive; extremely strong and pungent.

Pkt., .10; oz., .75

SPINACH

German,—Spinat

French,—Epinaud

Spanish,—Espinaca

One ounce for 100 feet of drill; 10 to 12 pounds in drills for an acre

J.B.R.S.Co.

Spinach

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

SPINACH (Continued)

This is a very important crop in our market gardens, and is one of the most easily managed of all vegetables, requiring but little culture, and may be had fit for use the entire season. The main crop is sown in September. It is sometimes covered up in exposed places with straw or salt hay during winter, which prevents it from being cut with frost; but in sheltered fields there is no necessity for covering. For summer use it may be sown at intervals of two or three weeks from April to August. Spinach is best developed and most tender when grown in rich soil.

King of Denmark. A fine long season variety remaining longer than most varieties before going to

seed; leaves large, crumpled and blistered. Deep green color. Pkt., .10; oz., .15; ¼ lb., .25; lb., .75

Long Standing Thick Leaved. Stands longest before running to seed; dark green.

Pkt., .10; oz., .15; ¼ lb., .25; lb., .75

Giant Thick Leaf. This variety gives the best results. The leaves are large, thick and somewhat crumpled, and it is equally good for spring or autumn sowing.

Pkt., .10; oz., .15; ¼ lb., .25; lb., .75

New Zealand. A valuable variety for the garden as it produces the thick, tender leaves throughout the summer. Grows very large and luxuriantly in warm, rich soil.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.75

RADISH

German,—Rettig, Rabies Spanish,—Rabano
French,—Radis, Rave, Petite Rave

One ounce will sow 100 feet of drill

Culture. The soil for Radishes should be very rich, light and mellow, well broken by digging, as their tender and mild qualities depend very much upon their rapid growth. For very early use sow in hotbeds in February and March and in the open air as soon as the ground can be worked, at intervals of ten or twelve days for a succession as long as they may be wanted. The winter varieties should be sown in August, lifted before severe frost, and stored in the cellar.

Vick's Scarlet Globe Radish. A leader among bright round Red Radishes. Quick maturing, extremely attractive, short tops, solid and fine flavor.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

Long White Vienna. Of rapid growth and beautiful shape; skin and flesh snow-white. The finest of long white radishes.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

China Rose. Bright rose-colored skin; flesh white and quality excellent; one of the best for fall and winter use.

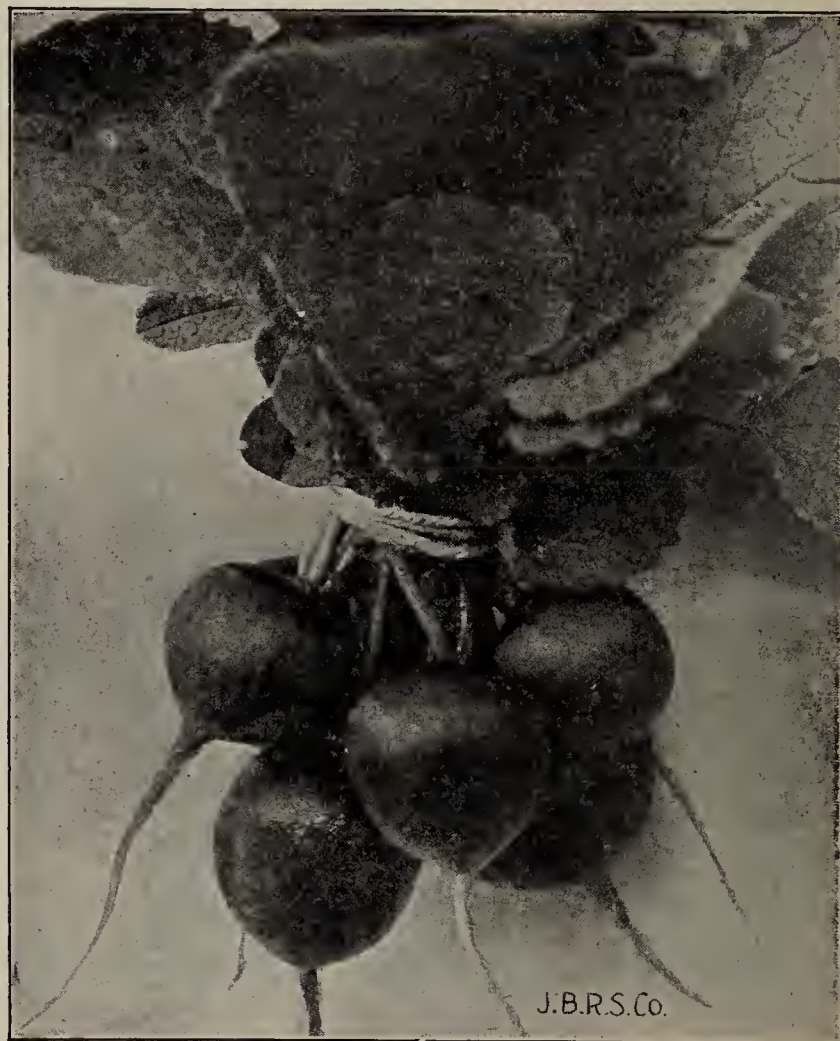

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

Early Scarlet Turnip. A well known and popular variety. Small top of quick growth, mild and crisp.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

Early Scarlet Turnip, White Tipped. One of the handsomest of the turnip radishes and a great favorite in many large markets for early planting outdoors. Roots slightly flattened on the under side; color, very deep scarlet with a white tip; flesh white and of the best quality.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

Vick's Scarlet Globe Radish

French Breakfast. Olive-shaped scarlet, with white tip; crisp and tender. Very early. A general favorite.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

Crimson Giant Forcing. Best of forcing sorts. Grown larger than other turnip shaped varieties and fine eating.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

For the Lawn, PURITY LAWN SEED IS BEST

RADISHES (Continued)

Long Scarlet. Short top. The standard variety of the long sorts, used either for forcing or open culture; six or seven inches long.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

Long Black Spanish. Long black, flesh white and slightly pungent; one of the latest and hardest.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

Round Black Spanish. Skin black, white fleshed and piquant flavor.

Pkt., .10; oz., .20; ¼ lb., .50; lb., \$1.50

SALSIFY or Oyster Plant

German,—Bocksbart French,—Salsifis
Spanish,—Ostra Vegetal

One ounce will sow 50 feet of drill

Culture. Sow the seed in light, deep soil, early in the spring, in drills twelve inches apart and one inch deep, thinning out the young plants to four or five inches. The roots will be ready for use in October, when a supply should be taken up and stored, like carrots. Those remaining till spring should be dug up before commencing their growth.

Mammoth Sandwich Island. We consider this the largest and most profitable salsify in cultivation. It is pure white in color and invaluable to market gardeners.

Pkt., .10; oz., .25; ¼ lb., .75

TOMATO

German,—Liebsapfel Spanish,—Tomate

In this latitude to produce extra early tomatoes the seeds should be planted in the hotbed about the middle of February, in drills five inches apart, and not over one-half inch deep.

For ordinary plants, sow the seed early in March.

When the plants are two inches high they should be transplanted three to four inches apart. The final transplanting to the open ground may be made the last of May, when the plants should be fine, large and stocky, and if sufficient soil is taken up with each plant, they will keep right on growing with no setback.

Red Head. An early variety, bright red in color, round and smooth, uniform in size and with an excellent flavor.

Pkt., .10; oz., .40

Earliana. It is remarkable for its earliness, very large size, handsome shape and bright red color. Its solidity and fine qualities are equal to the best medium and late sorts.

Pkt., .10; oz., .40; ¼ lb., \$1.25

Chalk's Early Jewel. This is a very productive variety. Ripens nearly as early as Spark's Earliana, but is more desirable for home use as the fruits are thicker through and more solid; borne in large clusters. Color bright scarlet and quality good.

Pkt., .10; oz., .40; ¼ lb., \$1.25

Red Head

Dwarf Champion. Dwarf and strong habit of growth; very solid and of extra quality.

Pkt., .10; oz., .40; ¼ lb., \$1.25

Ponderosa. Very large, solid and of a good flavor. Specimens have been grown to weigh four pounds. Bright red. Very few seeds.

Pkt., .10; oz., .40; ¼ lb., \$1.25

Stone. Fruit very large and deep; bright scarlet, smooth, ripening evenly to the stem without a crack; exceedingly solid and firm-fleshed, of the finest quality; one of the best for family use and for canneries. Late.

Pkt., .10; oz., .40; ¼ lb., \$1.25

June Pink. An early variety, similar in habit to the famous Earliana, differing only in its color, which is pink instead of red. Early, blight resisting, long and heavy yielding. An excellent shipper on account of its reasonably tough skin.

Pkt., .10; oz., .40; ¼ lb., \$1.25

John Baer. An extra early variety. Brilliant red. Almost seedless and sweet flavor. Uniform in size and ripening.

Pkt., .10; oz., .40; ¼ lb., \$1.25

Marglobe. The best of the blight-resisting varieties. Will withstand a long period of unfavorable weather. Fruit large, solid, and bright scarlet in color.

Pkt., .10; oz., .40; ¼ lb., \$1.25

SQUASH

German,—Kurbiss

French,—Cource

Spanish,—Calabaza

One ounce Early will plant 50 hills; one ounce Marrow, 25 hills

Culture. The plants are very tender and sensitive to cold, and planting must be delayed until settled warm weather. The general principles of culture are the same as those given for cucumbers and melons, but the plants are less particular as to soil. The summer varieties should be planted four feet apart each way, and the winter sorts eight feet. Three plants are sufficient for a hill. Care should be taken not to break the stems from the squashes intended for winter use, as the slightest injury will increase the liability to decay.

Improved Hubbard. The well-known and standard late variety; our strain is excellent.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

Golden Hubbard. A genuine Hubbard Squash except in color, which is a bright red; quality excellent.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

Warted Hubbard. A superior strain of mammoth size, and entirely covered with warty excrescences. Rich, dark-green color, and of very best quality.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

Blue Hubbard. A new type of Hubbard Squash said to excel all others in quality. Growth and habit same as Hubbard, but with a bluish-gray color.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

Giant Summer Crookneck. Double the size of an ordinary Crookneck and very warty, but similar in other respects. Their handsome appearance commands an extra price in the market.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

Delicious. We have found in this squash all that the originator claims for it. It is the driest, sweetest and finest flavored squash we have ever tasted. A fall and winter squash and is a good keeper.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

Boston Marrow. Fine fall variety; oval, bright orange; flesh yellow and firm; best for pies, and also for canning. Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

Early White Bush Scalloped. A standard summer variety; good either for home or market garden.

Pkt., .10; oz., .15; ¼ lb., .50; lb., \$1.50

TOBACCO

Connecticut Seed Leaf. Best adapted for the climate of the Northern and Middle States.

Pkt., .10; oz., .30

TURNIP

German,—Steckrube

French,—Navet

Spanish,—Nabo Comun

Turnips may be sown at all seasons from April to August in our climate, although those will be the best which are sown very early in spring for summer crops, and early in August for a fall and winter crop. A light soil, well manured the previous year, is the best. A few hundred pounds per acre of quick-acting fertilizer will have a tendency to make the roots smooth, and to make the rapid growth so essential in producing sweet and palatable turnips.

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

TURNIPS (Continued)

Extra Early Purple Top Milan (Flat). The earliest turnip in cultivation and a splendid variety; favorite with gardeners who want first turnips in market. Bulb white, flat, of medium size, with a bright purple top; one of the sweetest and finest flavored of summer sorts.

Pkt., .10; oz., .20; ¼ lb., .60; lb., \$2.00

Extra Early White Milan. This is one of our most popular turnips for spring sowing. It is a splendid extra early turnip in which the extreme earliness, small top and tap-root of the Purple Top Milan is united with clear white skin and flesh.

Pkt., .10; oz., .20; ¼ lb., .60; lb., \$2.00

Purple Top Strap Leaf. Rapid grower and mild flavor. The most popular variety for early use, either for the table or stock.

Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

Yellow Stone. A very popular yellow-fleshed variety, fine for table use. Flesh very firm, tender, sweet and fine flavored; an excellent keeper.

Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

White Egg. Belongs to the class of quick-growing fall turnips, and for this purpose should be sown in this latitude between August 1 and 10. Its shape is nearly oval or egg, as its name would indicate.

Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

Ruta Baga or Swedish Turnip

Ruta Bagas, or Swedes, should be planted from the last of June to about July 10, as they require more time in which to mature than the Early or Strap Leaf varieties. Newly-turned soil will produce the sweetest and smoothest turnips.

Long Island Purple. Undoubtedly the finest variety of purple-top Ruta Baga. Leaves few and small; bulbs fine shaped with very short, small necks; purple crown, skin and flesh bright yellow, solid, sweet and mild flavor. Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

White Sweet German. Sweet, and fine flavor. Good keeper. Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

Skirving's Purple Top. Well-known, yellow fleshed variety of large size and fine quality; for stock or table.

Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

Imperial Hardy Swede. Claimed by many to be the best Swede turnip grown. Bulb of large size with purple crown; flesh yellow; very smooth and heavy cropper. Pkt., .10; oz., .15; ¼ lb., .40; lb., \$1.00

Vegetable and Flower Plants

We have in their season a choice assortment of both vegetable and flower plants.

Tomato Plants. Dwarf Champion, Chalk's Jewel, Earliana, etc.

Cabbage Plants. All Seasons, Stone Mason, Drum-head, Danish Ball Head, Early Summer, etc.

Cauliflower. Snowball.

Celery. Giant Pascal, Golden Self-Blanching, White Plume.

Flower Plants. Pansies, Verbenas, Stocks, Salvia, Asters, Zinnias, Phlox.

Our Plants are all grown for us locally and are hardy and vigorous. Prices as low as can be made and furnish good, strong, healthy plants.

Bird Seed

Add 8c per lb., each additional lb. add .01 for postage. Prices subject to variations of the Market.

Canary.	Sicily, selected	Sunflower.	Russian
Hemp.	Russian, first quality	Millet	
Rape.		Cuttle Fish	Unhulled Rice

GRASSES AND GRAINS

NOTE—Owing to the frequent changes in price of Grains and Grasses we have refrained from inserting prices of them in this catalogue. The lowest market prices will be quoted on application.

Special Attention

While we carry several grades of the different varieties of seeds, we recommend our Purity Brand as the very best the market affords. These seeds are strictly Northern grown, and are selected by us because they possess the two essential qualities of purity and vitality. It is well known that there have been large quantities of Grass and Clover Seed sold as pure, which official analysis has shown to contain large percentages of adulteration. This not only defrauds the planter by selling him a worse than useless article, but inflicts injury also by filling his land with noxious weeds. We list Grass and Clover Seed according to their quality, grading down from our Purity Brand, which is always the best.

Timothy, Clovers, Millets, Red Top
in several grades

Purity Brand Lawn Seed
Our own mixture, from the purest seeds obtainable.
We can surely please you on this brand.

Choice Grass Seeds for Lawn and Farm

Timothy		Canadian Blue Grass		Grains	
Medium Red Clover		Orchard Grass		Prices subject to Market Changes

INSECTICIDES and FUNGICIDES

SPRAY CALENDAR AND GUIDE

Pest	What to Use	Dilution, lbs.	1st Spraying	2d Spraying	Successive Sprayings
Codling Moth	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ¾	Immediately after blossoms fall	2 weeks later	Consult your Exper. Sta.
Canker Worm	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ¾	When young first appear	4-6 days later	" "
Tent Caterpillar	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ¾	As insects appear	As needed	" "
Leaf Crumpler	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ¾	About middle of May	As needed	" "
Slug	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ¾	When insects appear	Repeat 10 da. 2 wks. if necessary	" "
Plum Gouger	Dry Arsenate Lead	*¾ to 1	Before leaves and buds open		
Strawberry Crown Borer	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ½	Late summer		" "
Strawberry Leaf Roller	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ½	In August		" "
Strawberry Slug	Dry Arsenate Lead	*1 to 1½	In May when insects appear		" "
Strawberry Root Worm	Dry Arsenate Calcium	½			" "
Imported Currant Worm	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ½	As soon as in- sects appear		" "
Gooseberry Fruit Worm	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ½	As soon as in- sects appear		" "
Raspberry Slug	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ½	Early in spring		" "
Raspberry Byturus	Dry Arsenate Lead Dry Arsenate Calcium	*1 to 1½ ½	1st of May		" "
Potato Beetle	Dry Arsenate Lead Dry Arsenate Calcium	*2 to 4 1½ to 2	When insects appear		Repeat as often as necessary

*To 50 gallons of water.

The above recommendations are condensed and are somewhat subject to change depending upon conditions in various sections of the country.

Where an effective combination Insecticide and Fungicide is desired, "Bordo-Arsenate" used at same strength as indicated for Dry Powdered Arsenate of Lead will give splendid results. Dry Powdered Bordeaux Mixture can be used as a dry dust just as it comes from the package or in combination with equal quantities of Dry Powdered Arsenate of Lead or Arsenate of Calcium. When using Dry Powdered Bordeaux Mixture as a wet spray use from three to five pounds to fifty gallons of water for the control of most fungus diseases.

Dry Powdered Insecticides can be used for dry dusting just as they come from the package.

For the convenience of the home gardener, the above table will be of interest.

Dry Powdered Arsenate of Lead where used at strength of one pound to fifty gallons of water, should be used at rate of two to three teaspoonfuls to one gallon of water.

Dry Powdered Arsenate of Calcium where used at rate of three-fourths pound to fifty gallons of water, should be used at rate of two to three teaspoonfuls to one gallon of water.

Dry Powdered Bordeaux Mixture when used at rate of three pounds to fifty gallons of water, should be used at the rate of from nine to twelve teaspoonfuls to one gallon of water.

Dry Powdered Bordo-Arsenate when used at rate of one pound to fifty gallons of water should be used at rate of three to four teaspoonfuls to one gallon of water.

ADVISED DUSTING SCHEDULE FOR APPLES

Time	Material	To Control
1. Late Winter Dormant and Delayed Dormant Stage	Dendrol Spray Oil	Scale, Red Mite and Early Scab
2. Pre-pink Stage After delayed dormant when blossom buds are exposed, but not separated	Kolodust or Free Flowing Sulphur	Apple Scab
3. Pink Stage Just as buds show pink and clusters are starting	Kolotex or 90-10 Sulphur Dust	Apple Scab, Bud Moth, Case Bearer and certain other chewing insects
3-A During seasons when a period of over five days elapses between pink and calyx Apple Scab infection. Kolodust contains no poison—will not injure bees.		
4. Calyx; just after petals fall	Kolokil (heavy poison content) or 85-15 Sulphur Dust	Apple Scab, Codling Moth, Caterpillars and certain other chewing in- sects
5. Five to ten days after petals fall	Kolokil or Kolotex	Curculio, Codling Moth, lesser apple worms and green fruit worms.
6. About July 5 to 15	Kolokil or Kolotex	Apple Maggot or Rail- road Worm.

(A) The above dusting schedule is merely a guide. Local or seasonal conditions may necessitate changes in time of application. The apple maggot or Railroad worm is best controlled by dusting according to the emergence of the flies. This period is usually the first or second week in July. For control of this insect application should be repeated in 14 days.

(B) In seasons when rains are frequent before petal fall, apple scab is more difficult to control. On such varieties as McIntosh Reds, R. I. Greenings and other susceptible varieties frequent applications should be made in order to keep all new growth covered against infection.

(C) Orchards should be kept under continued observation after applications for the control of Apple Maggot (as indicated in the schedule) have been made. Weather conditions may be conducive to the development of apple scab or sooty blotch and under such conditions further applications of Kolodust will be necessary. Late Codling Moth may become serious in which case it will be necessary to make further applications of Kolokil or Kolotex.

(D) Dust with Nicotine Mixture when Aphis becomes serious.

INSECTICIDES and FUNGICIDES

NIAGARA DUSTING MATERIAL.

STANDARD MIXTURES.

Name	Principal Ingredients	General Use
Free Flowing Sulphur	Dusting Sulphur with special spreader and sticker—300 mesh or finer.	Standard Sulphur Fungicide without poison for Apple Scab, Brown Rot, etc.
Kolodust (Patented)	Fused Sulphur Dust containing colloidal sulphur. A dust you can see stick.	The new exclusive Niagara Fungicide without poison for Apple Scab, Brown Rot, etc.
Kolotex (Patented)	Kolodust and Lead Arsenate.	The new exclusive Niagara Sulphur Fungicide with Lead Arsenate for chewing insects and diseases of apples, pears; Coddling Moth, Strawberry Weevil.
Kolokil (Patented)	Kolodust with greater poison content than Kolotex.	The new exclusive Niagara Sulphur Fungicide with heavy Lead Arsenate content, for chewing insects and diseases of apples, pears, etc.
D-25	Copper Lime Dust containing Monohydrated Copper Sulphate.	High content Copper Lime Dust for control of plant diseases such as potato blight where severe blight conditions prevail.
D-18	Monohydrated Copper Sulphate and Calcium Arsenate (poison)	Standard copper fungicide with poison for control of potato bugs and blight.
Nicotine Mixture	Nicotine Dust containing guaranteed analysis 3% annual nicotine.	For Aphids, Red Bug, Pear Psylla, etc. The standard contact dust for sucking insects.
Kolofog	Kolofog contains Sulphur Colloidal in its finest form. Non-Caustic to fruit foliage and operation. Sticks and protects.	Kolofog will not cut pumps nor clog nozzles. The premier material for stationary outfits. Mixes perfectly—velvet smoothness—not a by-product.

Dendrol Spray Oil

An improved miscible oil for use with hard or soft water. Can be used in combination sprays with Dry Lime Sulphur, Bordo Mixture, Lime Sulphur Solution, Soluble Sulphur Compound when necessary to provide a fungicide.

Arsenate of Lead Powder

Arsenate of Lead Powder kills most leaf-eating insects like Potato Bugs, Canker Worms, Elm Leaf Beetle, Gypsy and Brown Tail Moths, Potato Beetle and similar insects that feed on the foliage.

Bordeaux Mixture Powder

Bordeaux Mixture Powder can be used wherever paste Bordeaux Mixture has been used heretofore. It is splendidly adapted for both fruit trees and truck crop work, and can be used in combination with any insecticide, either as a dry or a liquid spray.

Bordo-Arsenate Powder—The Two-in-One Spray

This product combines the killing properties of Arsenate of Lead and the fungus preventative qualities of Bordeaux Mixture.

Dry Powdered Bordo-Arsenate being a scientific combination of Arsenate of Lead and Bordeaux Mixture will control both external leaf-eating insects and fungus diseases at the same time. It is prepared in dry powdered form which is a decided advantage over the old form of paste products.

Arsenate of Calcium Powder

The use of Arsenate of Calcium Powder as a stomach poison for controlling leaf-eating insects has become more general each year.

Lime-Sulphur Powder

Lime-Sulphur Powder is an improved standard spray material. Safe and effective, not only as a dormant spray, but also as a summer spray in combination with Arsenate of Lead. Tested by experiment stations and found superior to all dry compounds on the market, in safety and effectiveness. It will control San Jose Scale and many other scale insects. It is effective against Leaf Blister Mite, Peach Leaf Curl, Apple Scab and Brown Rot of cherries and plums.

Paris Green

Paris Green is the oldest and most widely-used spray poison on the market. As a spray on potatoes against "bugs" it has no peer.

Paris Green kills quickly on account of its high arsenic content and will not burn the foliage of potatoes because of its low percentage of water soluble arsenic.

INSECTICIDES and FUNGICIDES

NIAGARA FLOWER GARDEN

Dust or Spray

Code No. 354

AN exceptionally economical insecticide and fungicide combined, containing sulphur in its best disease preventing form, and lead arsenate in just the right proportion to kill all of the leaf- and bloom-eating insects and bugs. This is a material which if used according to directions will give a clean garden, free from insect and disease injury. Note that it can be either dusted on the plants, or mixed with water and sprayed.

Price, 1 lb. cannister \$.35

NIAGARA VEGETABLE GARDEN

Dust or Spray

Code No. 355

A GENERAL purpose, all-around material that can be dusted on the plants or mixed with water and sprayed. It will kill such bugs as potato bugs, tomato worms, army worms, and all other foliage- and leaf-eating worms and insects. It will prevent potato, tomato and celery blights and most other diseases. This material is exactly the correct combination of Bordeaux and Calcium Arsenate to do the job.

Price, 1 lb. cannister \$.45

NIAGARA BEAN BEETLE DESTROYER

Dust or Spray

Code No. 356

WHEN it comes to Bean Beetle, you want to kill them quickly. For years Niagara has led the procession in manufacturing machines and materials for this purpose. This material contains sufficient Magnesium Arsenate to "knock them dead" quickly, without burning the foliage. This formula is recommended by the United States Department of Agriculture.

Price, 1 lb. cannister \$.35

NIAGARA ROTENONE (non-poisonous)

Dust or Spray

Code No. 357

THE safest bug-killing dust or spray. Absolutely harmless to man or beast if used according to directions—yet it will kill, and kill quickly, bugs, beetles, worms and caterpillars, some plant lice, and thrips. It is a combination of Rotenone and Pyrethrum with a smooth, fast-dissolving carrier.

Price, 1 lb. cannister \$.55

When you buy NIAGARA DUST and DUSTERS you buy Protection

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

Carbola

Carbola is a white paint in powder form combined with a disinfectant twenty times stronger than carbolic acid. It is ready to use as soon as mixed with water — no waiting or straining. It can be applied with a brush or spray pump to wood, brick, stone, cement, plaster-board, etc., or over whitewash.

It paints and disinfects at one operation, and is recommended for use.

Instead of Whitewash and as a Disinfectant
Makes Work Easier. Gives Better Results

Sulphur Candles

The Crater Sulphur Candle Fumigator. ½ lb. size, .15, postpaid, .25; 1 dozen, \$1.25, postpaid, \$1.50.

Creonoid

Barrett's Creonoid is an up-to-date preparation from coal tar of invaluable service to the poultrymen, stock raisers and farmers. It eliminates flies and mosquitoes, and insures sanitary conditions in stables, stock sheds, around barnyards, etc.

Price, gallon cans, \$1.25

CROW CORN OIL

Protects newly planted corn from crows. Mix one part Anti-Crow Corn Oil with two parts hot water.

Price, .35; postpaid, .45

Crow Repellent

Stanley's Prevents crows, other birds, and animal pests from pulling corn. Protects corn from rot caused by moisture. Does not clog planter.

Price: Half Pint, \$.60, postpaid, \$.70; Pint, \$1.00, postpaid, \$1.10.

Powdered Hellebore

For use against leaf-eating insects such as rose slugs, currant worms, cabbage worms and many other leaf-eating insects where mild poison is required, as Powdered White Hellebore. Not available.

Price, ½ lb., .35

P. A. C. Formaldehyde

Prevents and Eradicates Stinking Smut of Wheat

For Oat, Wheat and Rye Smut (except loose smut of wheat and barley which this preparation will not control) spread the seed on the floor, sprinkle with P. A. C. Formaldehyde, 1 pound (1 pint) to 36 gallons of water, and shovel over to mix thoroughly, after which spread out and dry.

For Potato Scab, and to destroy other germs on seed potatoes, soak two hours in P. A. C. Formaldehyde, 1 pound to 15 gallons of water. Price, 1 lb. tins, .35.

Dr. Hess Dip and Disinfectant

Means Better Health Conditions For Your Farm Stock

It kills body parasites. It destroys disease germs. It keeps down foul odors. It makes healthful living quarters. It keeps the skin clean and healthy. Stock health is the basis of stock thrift.

For Household Use

For the Sick-room. Make a solution of Dr. Hess Dip and Disinfectant, 1 tablespoonful to a quart of soft, lukewarm water. Place in an open vessel in the sick-room and renew every other day.

Price: 1 qt., .55, postpaid, .65; 2 qt., .80, postpaid, .95. 1 gallon, \$1.40.

COOPER'S SHEEP DIPPING POWDER

The Original Powder Dip

One package makes twenty-five gallons of dip.

Price, .65; postpaid, .77

K-R-O Kills Rats Only

K-R-O will rid your premises without danger of killing livestock, pets or poultry.

Safest and most effective Rat Killer on the market.

Price: 2 oz. can, .75; postpaid, .80

Evergreen

Kills cutworms. Non-poisonous. Will not burn or injure the tenderest crop. Does not injure the soil in any way. Will not gum sprayers. Pleasant and easy to use. No unpleasant odor. When undiluted Evergreen retains its strength indefinitely.

To kill Cutworms, use one part of Evergreen to 100 parts of water. Spray around plants, wetting ground thoroughly. Cutworms coming in contact with the solution will come to the surface and die. Keep ground around plants moist. Do not use soap.

Prices: 1 ounce bottle, .35, postpaid, .45; 6 ounce bottle, \$1.00, postpaid, \$1.10; 16 ounce bottle, \$2.00, postpaid, \$2.15.

Dubay Seed Disinfectants

CONTROL SEED-BORNE DISEASES OF
FARM CROPS — STIMULATE GERMINATION
IMPROVE STANDS — GENERALLY PRODUCE
INCREASED YIELDS OF HIGHER QUALITY

SEMESAN BEL

for seed white and sweet potatoes

Simply mix, dip, drain, dry and your seed potatoes are ready for planting. Semesan Bel may be used on either whole or cut seed pieces. Semesan Bel effectively controls such seed-borne disease organisms as scab, rhizoctonia and black-leg. By controlling these diseases, germination is generally increased, stand improved and the resultant crop bigger and of better quality. One pound treats 16 to 20 bushels of seed. Du Bay Semesan succeeds the products sold as Du Pont Semesan Bel and Bayer Dipdust.

PRICES	
4 oz.	\$.50
1 lb.	1.75
5 lbs.	8.00

SEMESAN

for flower and vegetable seeds

PRICES	
2 oz.	\$.50
8 oz.	1.60
1 lb.	2.50
5 lb.	11.75

Semesan may be applied in dust or liquid form to the seed before planting. It is harmless to the seed but deadly to disease organisms that may be on the seed. Semesan is such a powerful and effective disinfectant that seed treatment with it is ridiculously low in cost, ranging from 1/4c. to 1c. per pound of seed. One ounce treats 15 lbs. of seed. Effective in controlling damping off and such devastating gladiolus diseases as hard rot and scab. Du Bay Semesan succeeds the products sold as Du Pont Semesan and Bayer Uspulun.

SEMESAN JR.

for seed field and sweet corn

Semesan Jr. is especially effective in controlling seed-borne infections of diplodia, Gibberella and Basisporium, without harming the seed embryo in the least. Its use protects the seed from rotting in the ground and makes possible earlier planting which generally results in increased yields. Improved germination, better stands, control of certain diseases, increased yields are the benefits which thousands of farmers are reaping, at a cost of less than 3c. an acre. Succeeds the products sold as Du Pont Semesan Jr. and Bayer Dust.

BETTER MILK

BETTER DAIRY and FOOD PRODUCTS
by using

B - K

STERILIZER — CLEANSER — DEODORANT
POWERFUL — SAFE — CLEAN — NON-POISONOUS — COLORLESS

Note These Remarkable Qualities of B-K

Powerful. By U. S. Hyg. Lab. Method of Test B-K has coefficient 10—i. e.—10 times greater germ killing strength than undiluted carbolic acid.

Safe. B-K contains no poison, acid, oil, or anything harmful to food products. Sterilizes utensils—is not a preservative.

Cleanser and solvent of casein and bacteria.

Deodorant. It destroys all odors and their cause—leaves no odor of itself—helps to keep the dairy and the products clean and sweet.

Clean. B-K is clear, and clean as water.

Cheap to Use. B-K is so powerful that very little makes many gallons of sterilizing solution.

Put up in single gallon and single 5-gallon packages each separately boxed.

For Highest Sanitation in

Milk Plant	Farm Dairy	Creamery
Condensery	Milk Powder Plant	Cannery
Cheese Factory		Food Product Plant

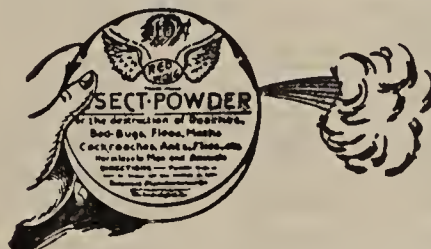

Prices: 4-oz. Bottle, .30; 10-oz. Bottle, .50; Quart Bottle, .90; Gallon Bottle, \$2.00; Five Gallon Jug, \$8.50.

BUG DEATH

Bug Death is a fine, tenacious powder, scientifically compounded and finely ground. It may be applied in water or DRY, just as it comes in package. We recommend DRY application; no drawing water, no mixing solutions. The best time for dusting is early morning when plants are wet with dew, which makes the powder "stick like all possessed."

Prices: 10 oz., Sifter Top Carton, .25, postpaid, .35; 12 1/2 lb. box, \$1.65, postpaid, \$1.85; 100 lb. Bag, \$10.25.

Insect Powder and Bellows Combined

Prices: Small, .10, Parcel Post, .05. Large, .25, Parcel Post, .06.

Red Wing is the best Insect Powder that can be procured and once you try it you will use no other. For the destruction of Roaches, Bed-Bugs, Fleas, Moths, Ants, Flies, etc.

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

COSTS YOU NOW ONLY

Nine cents per Billion Legume Germs as packed in 1 bushel sizes for Alfalfa and Clover.

8¢ per Billion for Soy Beans, Cow Peas, Lespedeza, and only 6¢ per Billion for Peas, Beans and Vetch—even lower rates on all large sizes.

IF IT'S PRICE ALONE—THEN USE 1 BUSHEL SIZE FOR 2 BUSHEL SEED

Although not recommended for best results ANY 1 bushel size NITRAGIN can be used for 2 bushel seed, and give good inoculation.

THE TRUTH ABOUT INOCULATORS

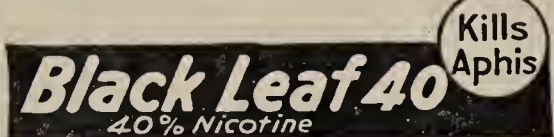

When you buy inoculation ALL you buy is Legume Germs. You cannot see them with the naked eye. All you see in the container is the material where these Germs live.

These Germs are PERISHABLE, whether packed in tins or in bottles inoculants over a year old may have little or no value.

The NUMBER of fresh, selected Legume Germs in a package is the most important thing to look out for—not the price or the size of the package.

NITRAGIN INOCULATION PRICES

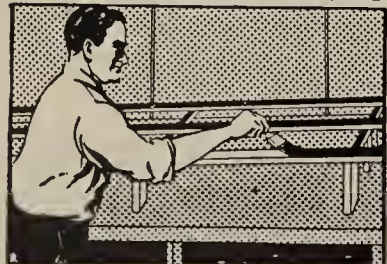

Alfalfa. All Clover, 1/2 bu., .35, postpaid .40; 1 bu., .65, postpaid, .75; Peas, Vetch, Beans, 1/2 bu., .35, postpaid, .40; 1 bu., .50, postpaid, .55; Soy Beans, Cow Peas, 1 bu., .35, postpaid, .40; 2 bu., .65, postpaid, .70; Peas, Beans, Sweet Peas—garden size, .25, postpaid, .30.

It Works While They Roost

A concentrated solution of Nicotine Sulphate. Active ingredients Nicotine 40%. For spraying fruit trees to destroy soft-bodied sucking insects. Each sucking insect must be "hit" by spray to be affected.

'PAINT' THE ROOSTS

WITH 'BLACK LEAF 40'

When chickens perch upon roosts that have been "painted" with "Black Leaf 40," fumes are slowly released and penetrate the feathers, killing the body-lice; no interference with egg production nor any discomfort to the birds. It is for these several reasons that poultry experts have welcomed the "Black Leaf 40" treatment so enthusiastically.

Packing and Prices

STIM-U-PLANT

An All-the-Year Fertilizer for Garden and House Plants

Growers of fine flowers, shrubs and vegetables for the best markets and for exhibition, fertilize and stimulate them frequently, a little at a time. An excellent fertilizer for this purpose is Stim-U-plant, an odorless, highly concentrated plant-food, in tablet form, with guaranteed chemical analysis of 11 per cent. nitrogen, 12 per cent. phosphoric acid, 15 per cent. potash. The proportions are accurate.

Stim-U-plant Tablets

can be used in tablet form, or dissolved in water at the rate of one tablet to the quart. Complete directions with every package.

Order Stim-U-plant tablets with your seed and plant order. Price, 10 tablets for 15 cts., postpaid, .20; 30 for 25 cts., postpaid, .30; 100 for 75 cts., postpaid, .80; 1,000 for \$3.50, postpaid, 3.75.

CARBOLINEUM

The following are inside the poultry house uses of the original and genuine Carbolineum which are worth your serious consideration:

Point 1. Prevents moisture, filth and dirt from working down into wood or concrete floors and makes cleaning floors easier.

Point 2. Disinfects deep cracks and crevices, where vermin and disease germs propagate.

Point 3. Prevents gnawing of wood by rats or mice.

Point 4. Kills and stops the propagation of chicken mites or fowl ticks in poultry houses for a whole year or purchase money refunded.

Point 5. Accomplishes the principal object of painting—wood preservation

—with lasting color effect. The bungalow brown color it stains wood makes it very suitable for painting exterior of poultry houses, shingles, posts or fences, and if trimmings are painted white, blends well with the surroundings anywhere.

Sold under Money Back Guarantee.

Prices: 1 gal. can, \$1.75; 5 gal. can, \$7.25.

Scene from the beautiful Horticultural Gardens at A Century of Progress Chicago. Vigoro was used to keep the exhibition gardens looking their best throughout the 1933 and 1934 Fair season.

for lawn and garden beauty Give Your Plants a "SQUARE MEAL"

TO GET a full measure of beauty from your lawn and garden you must feed them regularly with a complete, balanced plant food. We recommend that you use Vigoro, the complete plant food made by Swift.

Vigoro was the plant food selected for use on the Horticultural Exhibition Gardens at A Century of Progress in 1933 and 1934. These gardens amazed millions of visitors to the Fair with their beauty, yet conditions under which they were required to grow were extraordinary. It was necessary to make these gardens in washed sand, which had been covered with a thin layer of top soil. Vigoro was selected because only a complete plant food could assure finest growth.

VIGORO Is Easy to Use!

Anyone can have wonderful success with Vigoro if they will take three simple steps:

1. Read the directions enclosed in each bag of Vigoro.
2. Apply Vigoro evenly, sowing it by hand like grass seed, or better, putting it on with an efficient Vigoro Spreader. 
3. Immediately after applying to established lawns, soak down thoroughly. Soaking carries the plant food down to the plant roots. When not practical to water, applications to lawns should be followed by a light dragging to shake the plant food off the blades.

Gardens

VIGORO

Complete plant food

Clean, Odorless, Economical

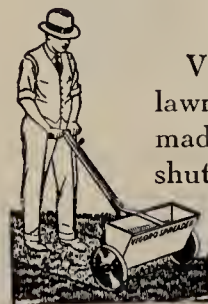

Vigoro is sanitary and odorless and does not contain weed seeds or refuse which are so objectionable to work with. It is especially formulated for use by the home gardener supplying lawns, flowers, shrubs, trees, and vegetables with the nourishment they need for finest growth. It is most economical to use, for only four pounds are required to feed properly 100 square feet of lawn or garden area.

SUPPLIES

DR. HESS POULTRY PREPARATIONS

Dr. Hess Poultry Pan-A-Min

PAN-A-MIN has been known to poultry raisers for more than 30 years as Dr. Hess Poultry Pan-a-ce-a.

It is now a greatly improved product. More minerals have been added. It contains new medicinal ingredients, and other active ingredients in different proportions. The improved product has been given a new name. DR. HESS POULTRY PAN-A-MIN means Pan-a-ce-a plus.

PAN-A-MIN is of high value to moulting hens, in egg production, in reducing chick mortality, in bone and feather growth and in maintaining health.

Prices:

3 lb. Pkg. \$.45, postpaid, \$.58

For Worms in Poultry

Dr. Hess Poultry Ver-Mi-Trol

is a flock treatment. No individual handling of birds is necessary. It is simply given with the feed in two 10-day courses, three weeks apart, with DR. HESS POULTRY PAN-A-MIN fed regularly.

It is not drastic, does not throw hens or pullets off production and does not interfere with growth and development of young birds. It is palatable, all birds eat it readily.

Prices: 4 lb. Pkg. \$1.00, postpaid, \$1.15
10 lb. Pkg. 2.25, postpaid, 2.45

Dr. Hess Poultry Tablets (Formerly Roup Tablets)

While there is no absolute cure for roup, DR. HESS POULTRY TABLETS are of high value in treating locally the swellings incident to the disease.

The Tablets are used as a local antiseptic and to medicate the drinking water. Thus used, they aid in preventing spread of the disease. Once the Tablets are in solution, they remain so permanently.

Price: 100 Tablets, \$.50, postpaid, \$.57

Dr. Hess Chick Tablets

(Formerly White Diarrhea Tablets)

Most diarrhea conditions in chicks, often mistaken for Bacillary White Diarrhea, are the result of improper feeding or brooding, and can be corrected by DR. HESS CHICK TABLETS. These Tablets are a bowel astringent to be given in drinking water.

Once the Tablets are in solution they remain so indefinitely.

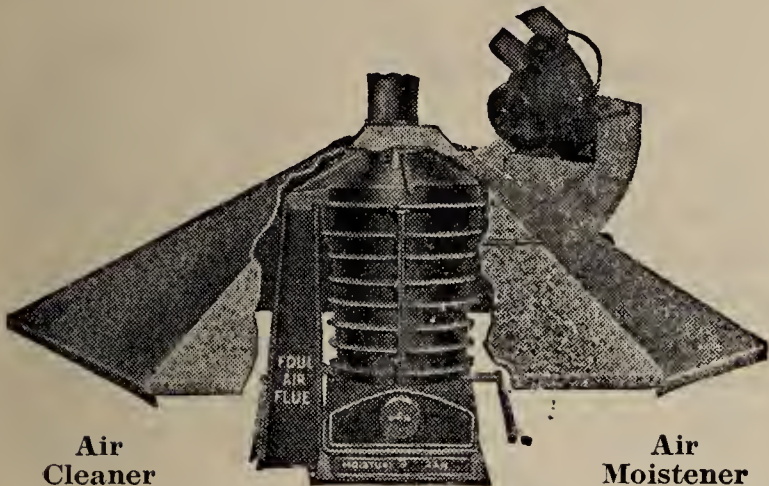

Price: 100 Tablets, \$.50, postpaid, \$.57

POULTRY SUPPLIES

Jamesway Coal Moistened Warm Air Brooder

**Air
Cleaner**

**Air
Moistener**

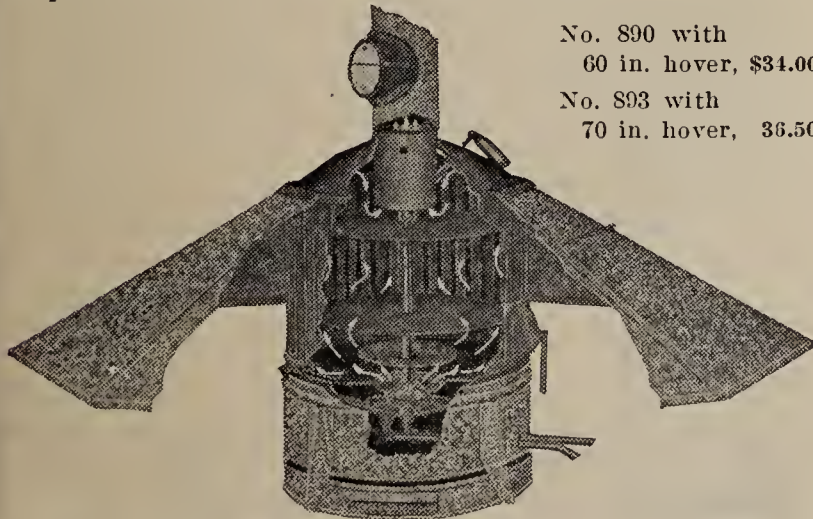

Don't take chances with your chicks. The brooder you use largely determines the kind of chicks you raise. Get the best! The Jamesway is the only coal brooder that has a special air purifier and also an air moistener and 3 point control—three exclusive Jamesway features you get in no other coal brooder.

BROODER NO. 660 \$23.50

Coal capacity about 45 pounds, 60 inch hover. Standard rating as given by many manufacturers is 1,000 to 1,500 chicks. Jamesway prefers to say that it will successfully brood 300 to 600 chicks in a brooder house with 125 to 400 square feet of floor space. Weight 155 pounds.

JAMESWAY New Oil Burning Brooder

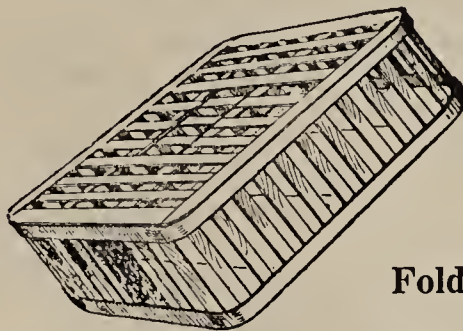

Easy to run. Keep the fuel in the oil tank and that's about all there is to it, once the temperature regulator is set. No ashes to empty, grates to clog, or wicks to trim. Special clean out rod keeps burner free of carbon. No need of taking stove apart to clean burner. Gives better combustion, hotter flame and greater economy of fuel. Burner casting is large, easy to clean. Moisture pan below burner lessens fire hazards, moistens and vitalizes air. Large handy clean-out door in stove. Sensitive, double-action draft equalizer in flue side tracks down drafts, checks excessive up-drafts, keeps an even fire in the most blustery, changeable weather, 60 or 70 inch galvanized hover revolves around stove, large hinged door gives access to all parts of stove and floor under the hover. Double filter between eight gallon fuel tank and stove filters oil twice before it enters regulator valve. Stove burns good grade kerosene or 38-40 distillate. Weight of stove, hover, oil tank and support is 200 pounds crated.

No. 890 with
60 in. hover, \$34.00
No. 893 with

Price: \$1.50, Postpaid, \$1.60

HASKELL IMPLEMENT AND SEED CO.
LEWISTON MAINE

COLONIAL PAINT

Colonial House Paint

A coat of paint is less than 1-100 of an inch thick. When damp rainy weather is alternated with the baking rays of the sun, this film of paint must be mighty good to "Save the Surface it Covers."

Colonial Paint is made to resist the destructive action of the elements which causes the ordinary paint to soon perish.

WHY IS COLONIAL HOUSE PAINT BETTER?

Purity

Unlike so-called "pure" paint, Colonial Paint is actually an absolutely pure paint because it contains only the highest grade of pure materials; Pure White Lead, Pure Oxide of Zinc, Pure Linseed Oil and the necessary color pigments and dryer.

The shades contain the necessary hardened tinting colors. The blind greens and some of the colors for trimming purposes are solid permanent pigments and therefore cannot be produced with either lead or zinc. Paint can be made of no better materials.

COLONIAL RAINPROOF FLOOR AND DECK ENAMEL

This is an enamel floor paint that flows on without showing a brush mark, leaving a mirror-like surface. One coat is sufficient on old work. Dries over night. Can be applied by anyone. Made for both exterior and interior use. Send for a color card of ten attractive shades.

COLONIAL RAINPROOF FLOOR AND DECK ENAMEL is the result of a scientific investigation as to the best materials and the proper manner of combining them in order to produce a desired result, viz.: An enamel that will dry quickly, firm, and successfully withstand to the greatest possible degree the hard usage to which floors and the like surfaces are necessarily subjected.

VEL-VE-TA

VEL-VE-TA Flat Oil Paint is an

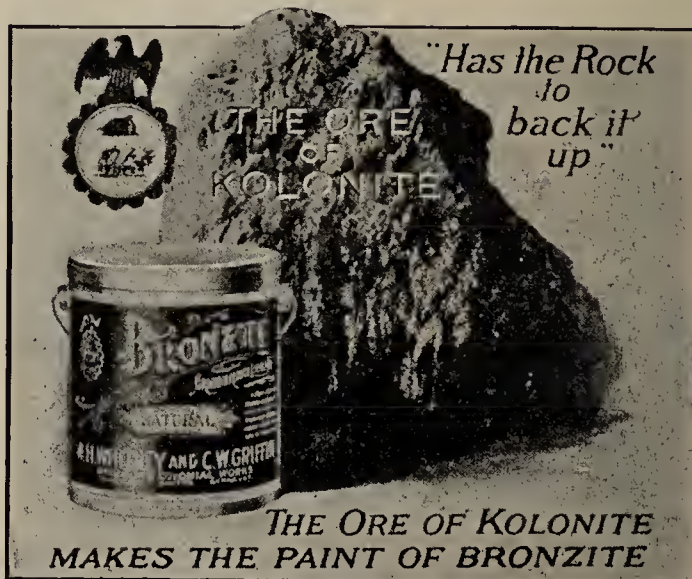

ideal finish for all walls. It dries with a velvet tone and soft, restful finish. Is washable and hence sanitary, and finger marks, dirt and blotches can be wiped off easily.

The twelve standard colors and White offer a wide assortment of popular wall colors. By an addition of white you can obtain lighter tints of any of the colors.

This paint may be used for all ceilings and walls, new or old woodwork, metal surfaces, concrete or cement, and all interior surfaces.

Bronzite

THE PERMANENT GREEN PAINT

Bronzite—"The permanent green paint"—insures the green color against fading on every job where it is used. Made in six beautiful shades and in all sizes.

No matter how good the rest of your home looks, if the green fades the whole job looks bad. Use Bronzite Green for perfect results.

Bronzite is ideal for all painting purposes where an intense green is desired. It is an exterior preservative paint of unusual excellence and is naturally of more than ordinary merit as an inside paint.

COLONIAL A NO. 1 VARNISHES

Colonial A No. 1 Varnishes are standard in quality, because they are made of the finest gums obtainable.

They are not affected by boiling hot water or ammonia.

Put up in all sizes and for all purposes.

LUS-TRO-LAC FOUR HOUR ENAMEL

Thousands of people have changed their furniture, autos, and boats from dull unattractive objects into shining examples of what just every day folks are able to make with a brush and a can of this wonderful Lustrolac Enamel—and it dries in four hours.

Dealers are turning their stocks on Lustrolac five to ten times a year because it is the best enamel you can possibly use on any surface either inside or outside.

Send for a free sample, enough to enamel the fenders of your car.

Lustrolac is also made in five shades of varnish stain suitable for floors and furniture—Light Oak, Dark Oak, Light Mahogany, Dark Mahogany, and Walnut.

Lustrolac Varnish Stain is made from the same varnish that makes Lustrolac Enamel so wonderful.

INTERESTING FACTS ABOUT LUSTROLAC ENAMEL

Several of the largest manufacturers of tubes used as containers for tooth paste, shaving soaps, etc., have adopted LUSTROLAC ENAMEL as their standard for enamel coating to be used on these tubes.

WHY?

Because it is the only enamel that retains its original luster and toughness when immersed for two days in a strong solution of soap and water.

LUSTROLAC is a SUPERIOR ENAMEL.

ADHESIUM

Adhesium is a wall paper size so sticky that lincrusta can be hung on any surface without fear of it coming off.

Adhesium will detect the hot spots, showing where to shellac to prevent free lime from burning through the wall paper.

Adhesium may be used as a primer on new wood, as a "between coater," thus saving stock and labor.

Adhesium is indispensable to the careful decorator.

Adhesium is cheaper than glue and 100 times more effective.

Martin's 100% Pure Outside Spar Varnish

is especially prepared for finishing front doors, store fronts, window sills, porch railings, and other surfaces of wood, which are exposed to the most severe weather—possesses remarkable elasticity, contracting or expanding with cold or heat. Gives splendid results on all upper parts of water craft (see 4 Hour Spar Varnish, for use below the water line, and for other surfaces immersed in water).

Martin's 100% Pure Outside Spar Varnish is quite pale in color, and the tough finish it gives, protects and preserves the surfaces over which it is applied. Covers 750 square feet per gallon, one coat, with proper surface conditions. Allow 24 to 48 hours to dry between coats, depending on weather conditions. Allow an additional 24 hours before sanding.

Gals.	1/2 Gals.	1/4 Gals.	1/8 Gals.	1/16 Gals.
\$5.50	\$2.95	\$1.60	\$.90	\$.55

THE HIGHEST QUALITY SPAR VARNISH

Martin's Amber-Lyte Penetrating Floor Finish

The feature of this remarkable combination of treated oils is the fact that it does not merely form a surface coating. It PENETRATES DEEP INTO THE PORES OF THE WOOD and hardens, binding the fibres of the wood together into a hard impenetrable surface, to which dirt and grease cannot adhere. It forms an ideal under-

coat for Martin's 100% Pure Floor Varnish.

Martin's Amber-Lyte is used alone as a practical finish for kitchens, schools, hospitals, churches and other institutions where there is excessive wear. It must be well brushed out, and applied in thin coats. Covers 1000 to 1200 square feet per gallon, one coat, with proper surface conditions. Dries hard over night and can be sanded in 24 hours.

Gals.	1/2 Gals.	1/4 Gals.	1/8 Gals.	1/16 Gals.
\$4.30	\$2.35	\$1.30	\$.70	\$.45

THE PENETRATING FLOOR FINISH

A "Good Roof" means a "Trouble-free" Roof

Here's a roofing you can put on a building—and then forget.

Rotproof and rustproof—Everlastic Mineral-Surfaced Roofing doesn't call on you for care or maintenance,—no painting, no staining, no upkeep of any kind.

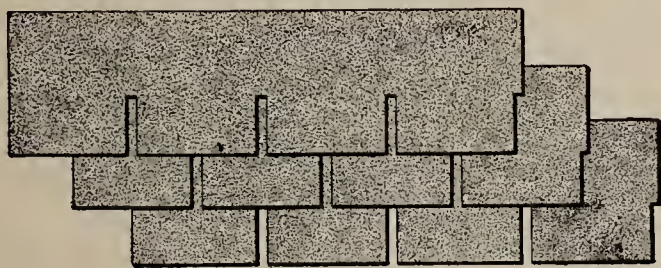

And it's fire-safe. If sparks or embers light on your roof, they sizzle out harmlessly. Moreover, Everlastic Mineral-Surfaced Roofing adds good looks to a building. It presents a surface of fadeless mineral in attractive colors—soft Red, moss Green, or shadowy Blue-Black.)

Note this special feature of real

value—the 2 inch "selvage." This furnishes an accurate guide in laying. It's a simple matter to distribute the cement evenly on this selvage—no cement streaks smearing up the roofing. Moreover, laps stay tight.

In brief, no better value on the market than this fine, time-proved roll roofing.

Smooth-Surfaced Roofings: Where this type of roofing is desired we recommend the Barrett Everlasting Brand, a roofing of heavy felt base thoroughly saturated with bitumen, that will give long years of satisfactory service.

A Barrett shingle roof makes any house easier to sell. Color in a roof also helps the sale value. Everlastic

Multi-Shingles, colorful and sturdy, are frequently used for re-roofing over old wooden shingles.

Not Just a Roof - A Lasting Protection

Any roofing will protect your house—for a while. But you want lasting protection. Protection against leaks—against heat in summer and cold in winter—against fire.

All this is assured in Barrett Everlastic Shingles. And in addition you get color—beautiful reds, greens, shadowy blue-blacks as well as variegated tones.

While Barrett has many styles of shingles, none is more popular than the sturdy Everlastic Multi (4-in-1) self-spacing strip shingle. It's now made in

36 in. width instead of 32 in., a real improvement. It takes 10% fewer strips per hundred square feet. There is a corresponding reduction in laying costs and the larger shingles look very handsome on the roof.

You can make no more satisfactory selection than to choose Everlastic Multi-Shingles. Sizes: 10 in. x 36 in. and 12½ in. x 36 in. and both attractively priced.

We will gladly send you an interesting roofing booklet.

Martin's Liquid Wax

Produces a rich, soft, velvety glow on furniture, floors and other surfaces to be waxed. Martin's has cleansing properties which remove dirt from the surface—the wax itself provides a non-dirt-collecting film over the surface. This polishes readily to a beautiful finish.

Handsome Maple, Birch, or Oak floors will be well protected with Martin's Liquid Wax.

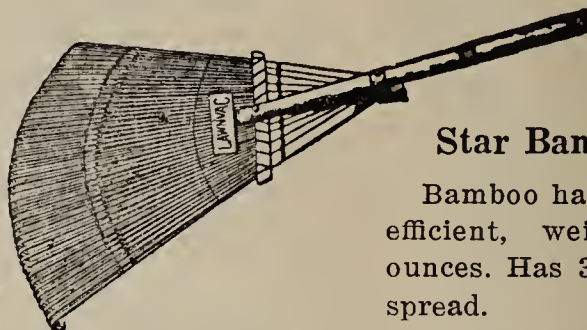

For your fine furniture Martin's Liquid Wax will produce a finish to which dust and lint will not adhere and on which finger prints will not show.

Pint can, \$.70, postpaid, \$.80; half pint can, \$.50, postpaid, \$.55.

Pop Frier

3MB Pop Frier, 3 quart size, with pan for popping corn over blue flame. Price, \$.50; postpaid, \$.60

Star Bamboo Rake

Bamboo handle. Light and efficient, weighs only 16 ounces. Has 33 teeth, 18 in. spread. Price, \$.25

Yamade Bamboo Rake, 18 in., 33 teeth, with metal band. Price, \$0.75

Martin's Paste Wax

Polishes quickly and easily—revives the original finish—provides actual protection for the surface on which it is used.

Because of the purity of the Wax Materials used in its manufacture, Martin's Paste Wax will cover more surface than other Waxes. This makes Martin's economical to use.

Martin's Paste Wax has none of the greasy, smeary, slippery characteristics so objectionable to housewives.

2½ oz. can, \$.25, postpaid, \$.35; ½ lb. can, \$.45, postpaid, \$.55; 25 lb. can, \$20.00.

HAY CARRIERS

The Myers O. K. Hay Unloader

For Rope or Cable Draft

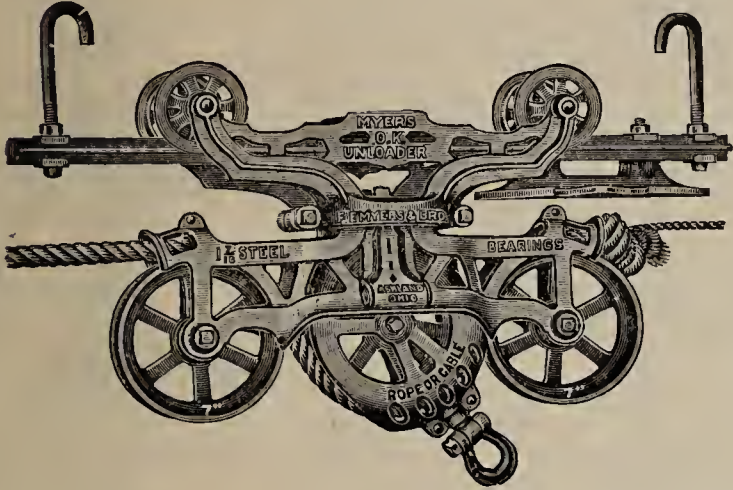

Fig. 1652

Reversible and Swivel

The Myers O. K. Unloader with extra long truck and seven-inch sheaves for cable draft rope is especially designed for heavy work. The long truck distributes the load on the track and adapts the car for using two forks or slings.

The bearings on all rope sheaves are 1 7-16th diameter, hard turned steel.

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

Myers Self-Oiling Bulldozer Power Pump

The Power End consists of a one-piece casting which forms the base of the pump and oil reservoir and encloses all working parts, protecting them from dirt or injury, and securing safety of operation. From the oil reservoir in the base, oil is carried by the main gear to the highest parts of the pump and by a system of channels distributed to all moving parts and returned again to the reservoir. This system of flood lubrication contributes quiet operation and long life, with a minimum of attention.

Planet Jr. Garden Tools

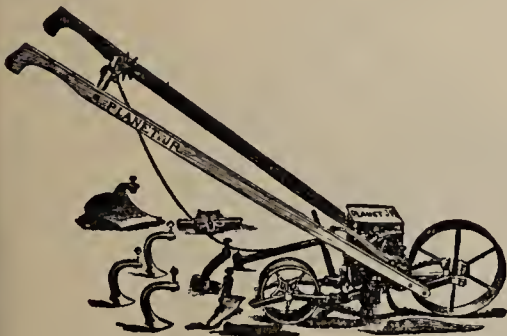

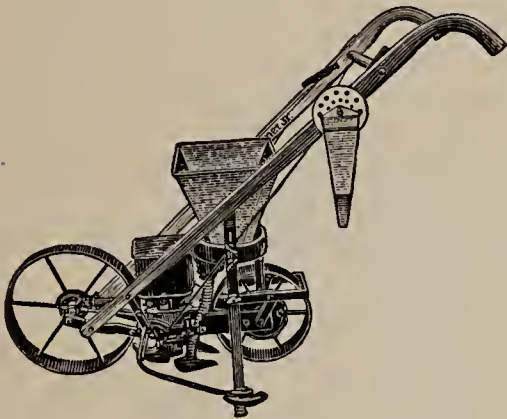

PLANET JR.
No. 300A SEEDER
Price \$18.75

The No. 300A will drill any size seed from turnips to bush limes. The seed is forced through holes in a seeding plate by means of a specially designed feed wheel which insures a uniform flow of seeds without crushing or cracking. Many exclusive features combine to make it an extremely accurate seeding device. The hopper holds 4 quarts and can be easily removed for emptying excess seed.

PLANET JR.
No. 320
FERTILIZER
ATTACHMENT
Price \$12.50

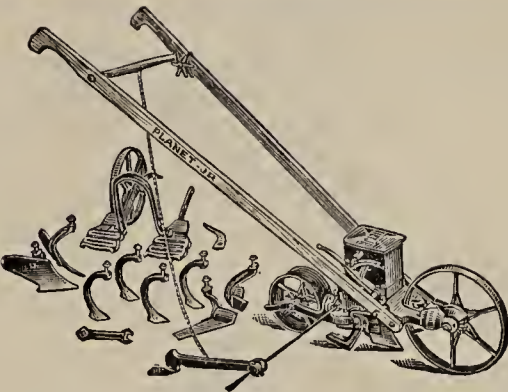

This attachment fits the No. 300A Seeder and will distribute fertilizer in bands on either side of the row while the seed is being planted. Or it can be used for placing formaldehyde dust on the seed while it is being planted. It can also be used for side-dressing growing crops. The amount of fertilizer can be accurately regulated to sow from 100 to 1,500 pounds of dry commercial fertilizer per acre in 12 inch rows.

PLANET JR.
No. 4 COMBINED
SEEDER AND
WHEEL HOE
Price \$16.75

This seeder is popular with com-merical growers and home garden-ers alike. It will plant any size seed from turnip to kidney beans either in continuous rows or in hills 4, 6, 8, 12 or 24 inches apart. By changing a single bolt the seeder hopper can be taken off and the wheel hoe frame substituted converting the machine into a sturdy single wheel hoe and cultivator.

No. 4D Plain Seeder—Price \$13.50. This is the same as the No. 4 but does not include the cultivator frame and equipment.

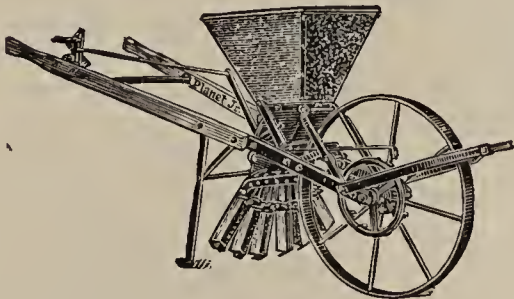

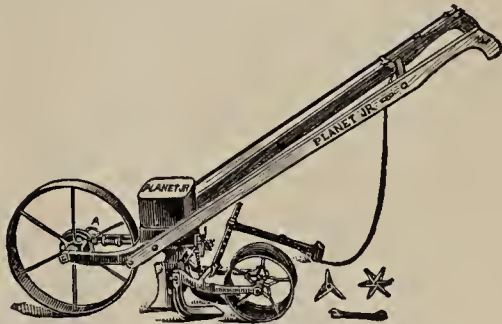

PLANET JR.
No. 25 COMBINED
SEEDER AND
DOUBLE WHEEL
HOE
Price \$21.00

This outfit is known as the "Complete Gardener." As a seeder it is similar to the No. 4 and will handle any vegetable seed in drills or in hills 4, 6, 18, 12 or 24 inches apart. It can then be converted into a double or single wheel hoe. As a double wheel hoe it can straddle the crop until it is 20 inches high hoeing both sides of the row at once. The cultivator teeth are just right for regular cultivation and the plows can be used either for opening a furrow or for hilling up or closing the furrow.

PLANET JR.
No. 3 SEEDER
Price \$16.50

The No. 3 Seeder is an old time favorite with market gardeners. It will plant any vegetable seed from turnip up to kidney beans either in continuous rows or in hills 4, 6, 8, 12 or 24 inches apart. The change from drilling to hilling can be made in a moment. The index is conveniently located on the handle making it easy to adjust for different seed. The shut-off is also on the handle making it easy to close off the flow of seed at the end of the row.

PLANET JR.
No. 220
FERTILIZER
DISTRIBUTOR
Price \$26.00

This Planet Jr. Distributor provides an efficient means of side-dressing and fertilizing growing crops. It can be used for distributing fertilizer in the middles of three rows up to 14 inches apart or will side-dress one side each of two rows up to 36 inches apart. Special gates are furnished to permit distribution through only the two middle spouts or two or three spouts on either the right or left hand side. The quantity of fertilizer can be accurately regulated from 200 to 2,000 pounds per acre.

Planet Jr. Garden Tools

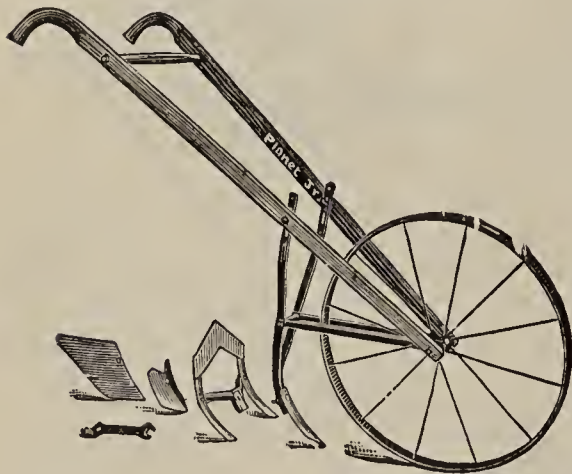

PLANET JR. No. 12 DOUBLE WHEEL HOE
Price \$10.25

Planet Jr. Double Wheel Hoes are offered in three different combinations the difference being only in the amount of equipment furnished with them. The No. 12 illustrated above is the most popular as it includes all the attachments required for most gardening operations.

No. 11 Double Wheel Hoe includes all the attachments illustrated above and in addition one pair of 4½ inch hoes, one pair 5-tooth rakes and one pair of 3-tooth rakes. Price \$13.00.

No. 13 Double Wheel Hoe equipped with one pair of 6 inch hoes only. Price \$7.60.

PLANET JR.
No. 119
GARDEN
PLOW

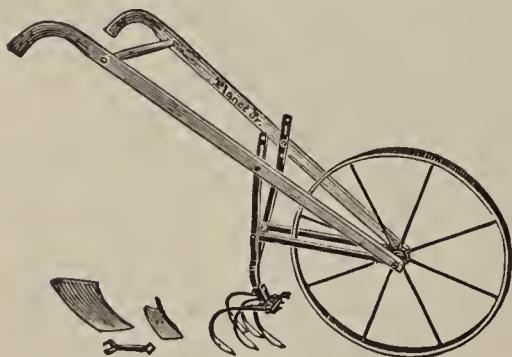

Price \$4.00

The No. 119 has a 24 inch steel wheel and all steel frame. The attachments are all hardened and tempered and will give fine service. The reversible

scuffle blade can be used for hoeing and weeding and reversed for cultivating.

PLANET JR. No. 119W GARDEN PLOW
PRICE \$4.25

The No. 119W is the same as the No. 119 except that it is equipped with a 5-prong forged spring steel cultivator attachment in place of the reversible scuffle blade. Many people prefer a cultivator of this type as it works with a minimum of effort and does a fine cultivating job.

PLANET JR. No. 17 SINGLE WHEEL HOE
Price \$7.35

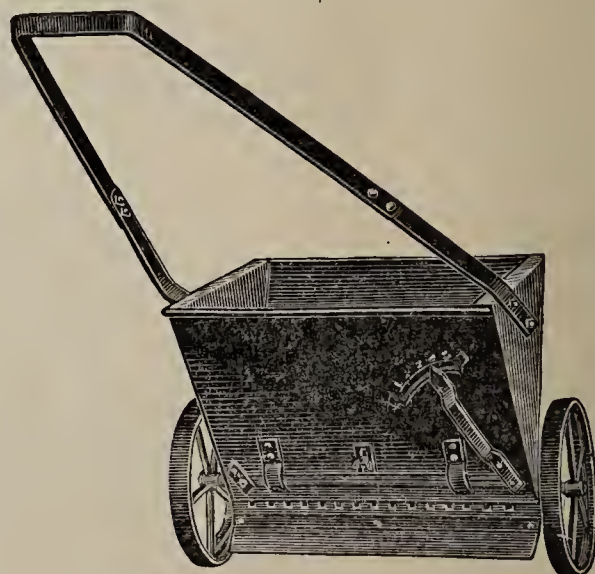

Planet Jr. Single Wheel Hoes are made in four different styles. The difference being only in the equipment furnished with each. The No. 17 illustrated above is the favorite as it includes the three types of attachments needed in nearly every garden. The hoes for shallow cultivation and for weeding, the cultivator teeth for deeper cultivation and the plows for plowing, hilling, furrowing, etc. The frame and wheel arms are forged steel, light weight but practically indestructible. The frame is adjustable for height and the handles are adjustable to suit the operator.

No. 16 Single Wheel Hoe includes all the equipment illustrated with the No. 17 and in addition has one 5-prong and one 3-prong rake and a leaf lifter. Price \$8.50.

No. 17½ Single Wheel Hoe is the same as the No. 17 except that it does not have the plow. Price \$6.40.

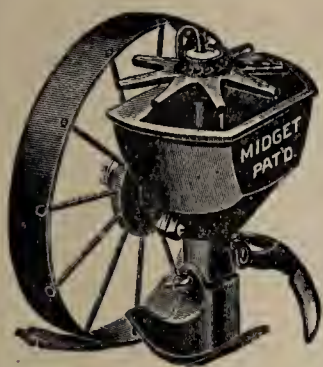

No. 18 Single Wheel Hoe is equipped with one pair of 6 inch hoes only. Price \$5.50.

PLANET JR. No. 210 SPREADER
Price \$5.50

The Planet Jr. Spreader will handle prepared plant food, commercial fertilizer, grass seed, insecticide, etc. and will spread the material evenly and in any desired quantity. The lever on the back regulates the size of the opening and a paddle inside the hopper insures an even flow of fertilizer.

Most Popular Seeder Made

The MIDGET SEEDER will pay for itself in a short time, because it saves by sowing accurately. Sowing by hand wastes seed.

It is very easy to operate and drills almost any kind of garden seed from the smallest up to and including peas and beans.

The index is in plain view and easily adjusted. The shoe

is adjustable for any depth desired, and the coverer swings free.

The Midget opens the furrow, sows the seed and covers up, all in one operation.

It is sold with handle complete, or may be easily attached to almost any wheel cultivator. Hopper holds one pint. Weight 6 pounds.

No. 1 H with handle, Price\$4.25

Quick-Adjustable Cultivator

The TRUE TEMPER GENEVA, No. G2, is recognized everywhere as the only real quick-adjustable cultivator on the market.

It has a New Mulcher-Pulverizer, Weeding Hoe, a Plow and five Cultivator Teeth, all permanently attached to a revolving steel plate.

Any of these tools may be securely locked into working position by a few turns of the hand Wheel—a time and labor saver.

Machine has steel forged tools, well selected oak handles, with comfortable handle grips. It has 14-inch steel wheel and is finished in colors, then varnished. Weight 20 pounds.

No. G2, Price\$5.75

Iron Age

No. 19-C

No. 19-C Iron Age Wheel Cultivator and Plow is a low-priced tool and will always be a convenience to have for many kinds of work.

It does the necessary plowing in many soils, opens furrows for seed or fertilizer and covers on the return trip. Shipping weight, 22 lbs. Price\$4.75

John Deere Steel Walking Cultivators

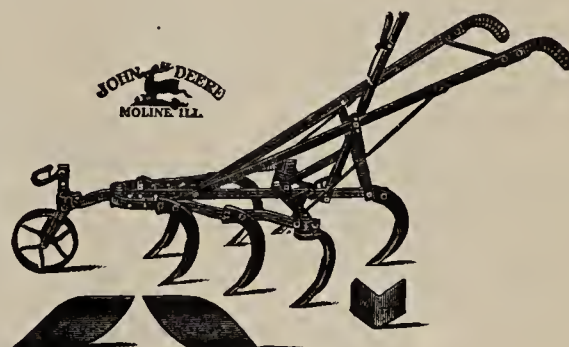

5 Tooth Steel Cultivator

No. 306. 5 Tooth with lever and gauge wheel.

Price, \$8.00

Same high-grade construction as the 5 tooth and having two more teeth.

7 Tooth Steel Cultivator

No. 314. 7 tooth with lever and gauge wheel.

Price, \$9.25

Horse Hoe Attachment, for 5 or 7 tooth..... 1.75

Long Hiller Attachment, for 5 or 7 tooth..... 3.75

Deere Steel 14 Tooth Cultivator

No. 320. 14 Tooth lever and gauge wheel. Price, \$8.00

Cahoon Seed Sower

Will sow all kinds of grass and grain seeds from four to eight acres per hour at a common walking gait. Heavy seeds, such as wheat, it will throw 40 feet (20 feet each side of the operator); lighter seeds, of course, will not be thrown so far.

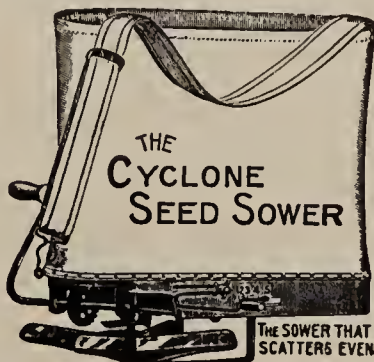

Price, \$5.00; Postpaid, \$5.15

Cyclone Seed Sower

This sower is guaranteed to distribute all grass seeds and grains perfectly even and directly to the land. Sows grass seed from 18 to 20 feet and grains a longer distance.

Price, \$2.25; Postpaid, \$2.40

HASKELL IMPLEMENT AND SEED CO.
LEWISTON MAINE

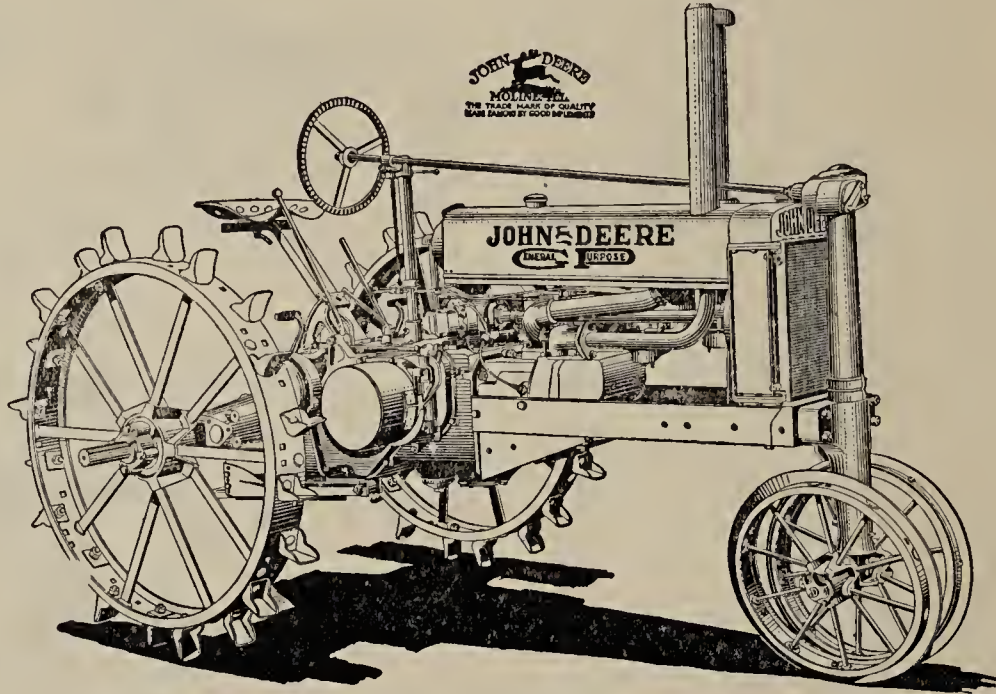

JOHN DEERE WIDE-TREAD GENERAL PURPOSE TRACTOR

In the John Deere Models A and B Tractors you get the features you want. A simple tractor, easy to service—a tractor with an engine that will successfully burn low cost fuel—a tractor with an adjustable wheel tread—a tractor that is easy to steer and operate—a tractor that provides an unobstructed, clear view of the work ahead—a tractor backed by a farm equipment company that has built quality equipment for nearly a century.

MODEL A

Will pull two 14 inch bottom plows, 8 foot double acting harrow, 2 or 4 row cultivator, 2 row potato planter, and 2 row potato digger. Power driven and tractor drawn mowers. Besides ample power from belt pulley to operate all implements on the farm which require belt power.

MODEL B

Will pull one 16 inch bottom heavy duty tractor plow, 5 foot double acting harrow or 10 foot single action 2 row cultivator, 2 row potato planter, 1 row potato digger. Power driven and tractor drawn mowers. Belt pulley will operate all implements requiring belt power up to 15 H.P.

SPECIFICATIONS MODEL A

CAPACITY. Two 14 in. plows, 22 in. thresher.

SPEEDS. First, $2\frac{1}{3}$; Second, 3; Third, $4\frac{3}{4}$; Fourth, $6\frac{1}{4}$; Reverse, 3 M.P.H.

CRANKSHAFT. Main Bearings $2\frac{3}{4}$ in. x $3\frac{1}{4}$ in. Connecting Rod Bearings 3 in. x $2\frac{3}{8}$ in.

LUBRICATION. Force feed, full pressure, geared pump.

CARBURETOR. Double-nozzle type with air choke.

AIR CLEANER. Oil Wash type with vertical air stack.

COOLING. Tubular radiator, thermo-syphon.

AIR FAN. Gear driven, no belts; R.P.M. 1903; diameter $16\frac{1}{2}$ in.

GOVERNOR. Enclosed flyball type.

CLUTCH. 10 in. dry disks, locking in and out.

BELT PULLEY. 13 in. diameter, $7\frac{1}{2}$ in. face, 975 R.P.M.

BELT SPEED. Feet per minute, 3270.

TRANSMISSION. Spur gear, selective type, four speeds forward, one speed reverse.

GEARS. Forged steel cut and heat treated.

FINAL DRIVE. Forged steel cut and heat treated.

REAR WHEEL TREAD. 56 in. to 80 in.

SPECIFICATIONS MODEL B

CAPACITY. Handles the 4-horse load on drawbar jobs.

SPEED. First, $2\frac{1}{3}$; Second, 3; Third, $4\frac{3}{4}$; Fourth, $6\frac{1}{4}$; Reverse, $3\frac{3}{4}$ M.P.H.

CRANKSHAFT. Main Bearings $2\frac{1}{4}$ in. x $2\frac{1}{2}$ in. Connecting Rod Bearings $2\frac{1}{4}$ in. x 2 in.

LUBRICATION. Full force feed, pressure-geared pump with oil filter.

CARBURETOR. Double-jet type.

AIR CLEANER. Wash-down type with stack.

COOLING. Tubular radiator, thermosiphon.

AIR FAN. Gear driven, no belts; R.P.M. 1920; diameter $13\frac{1}{2}$ in.

GOVERNOR. Enclosed fly-ball type.

CLUTCH. Two 8 in. dry disks locking in and out.

BELT PULLEY. $10\frac{5}{8}$ in. Diameter, 6 in. Face, 1150 R.P.M.

BELT SPEED. Feet per minute, 3200.

TRANSMISSION. Spur gear, selective type, four speeds forward, one speed reverse.

GEARS. Forged steel cut and heat treated.

FINAL DRIVE. Enclosed hardened steel gears.

REAR WHEEL TREAD. 56 in. to 80 in.

Low Pressure Pneumatic tires with corresponding wheels and wheel weights available as special equipment on both the Model A and B.

Write for Special Booklet on these Tractors

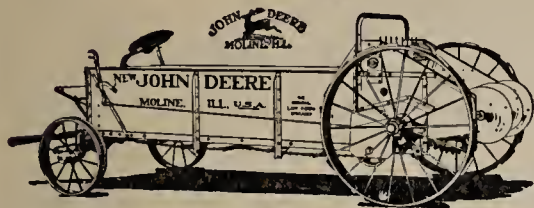

HASKELL IMPLEMENT AND SEED CO. LEWISTON MAINE

NEW JOHN DEERE

The Low-Down Spreader with the Beater on the Axle
and the Box-Roll Turn, Narrow Type—
Tight Bottom

The easy-loading feature on the New John Deere Spreader is one of its important advantages. The low box does

away with high pitching, the hard part of loading; it saves work.

The beater on the axle, which permits lowering the rear end of the box, because the axle is not underneath it. In accomplishing this desired result, it has not been necessary to reduce the height of the drive wheels, neither is it necessary to throw the manure over the drive wheels in loading.

The Box-Roll Turn, which permits short turning without cutting the front wheels under the box, gives you a box that is exceptionally low and easy to fill.

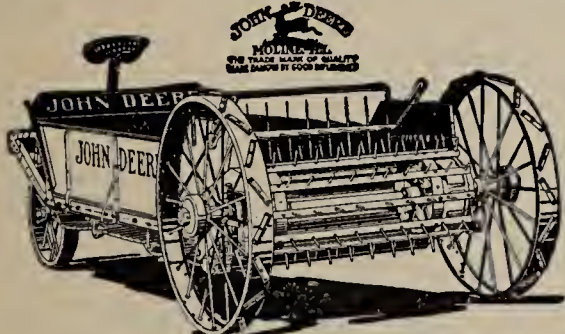

Don't forget, the New John Deere Spreader is the only spreader built that has the beater on the axle and the box-roll turn. Both are exclusive features which are of real value to you.

Roller-bearing equipment at both ends of all three beaters reduces draft and wear at these important points.

A tapered box—wider at the rear—does away with friction between manure and box sides as the load moves toward the beaters.

John Deere Manure and Straw Spreader

The Spreader with the Beater on the Axle

The Low-Down Spreader with the High Drive Wheels

Easier on the Man. Only 36 inches to the top of box—6 to 10 inches lower than other spreaders—a big time- and labor-saving feature.

Easier on the Horses. The high wheels on this spreader from 4 to 8 inches higher than used on other spreaders, give it a light-draft advantage.

The load of manure, which in itself weighs a ton on the average, is moved back to the beater on an apron which runs on many rollers—the load is not dragged.

The location of the beater in relation to the apron is such that the teeth engage the manure as it is fed to them in practically a horizontal position—they do not work against the load as it moves backward.

Does a Better Job of Spreading. You can load the John Deere just right for the most effective spreading—flat on top and from the front to the rear.

PAPEC FARM MACHINERY

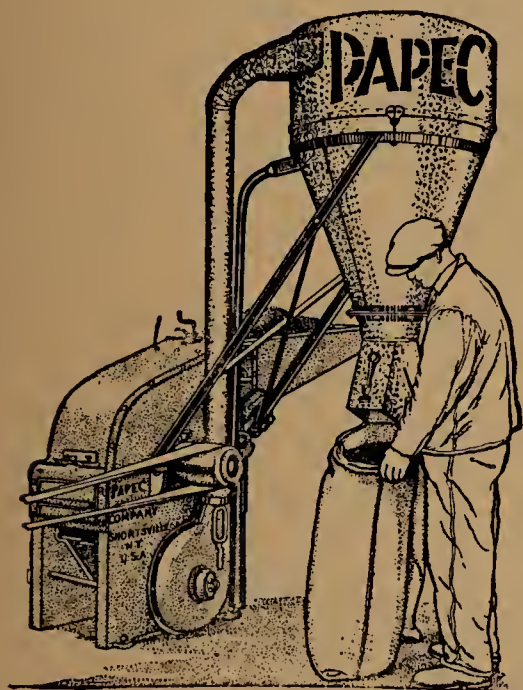

PAPEC ENSILAGE CUTTER

A new Papec Cutter will put more even-cut ensilage into your silo at a lower cost per ton than any other machine. That's why there are more Papecs in use than any other make. Whether your power is a three horse gas engine or a 15-30 tractor, you will find a Papec size and model that meets your exact requirements. The new Papec catalog gives figures on silo filling costs and tells how they can be reduced. Call for your copy next time you are in town—or write for it today.

HAY CHOPPER-SILO FILLER

Here is a machine that is unsurpassed as a silo filler, yet has an even more important use. With it you can put chopped hay into the mow easier, cheaper, and quicker than you can put up whole hay with a fork or slings. No more work in the hot, dusty mow. The hay is blown wherever you want it. It takes half the usual space, keeps perfectly, is easier to get out of the mow, is cleaned up by all classes of stock without waste of coarse parts. Send for our booklet, "A Better Way to Put Up Hay".

FEED AND ROUGHAGE GRINDERS

You know from experience that grinding increases the value of small grains around 25%. Grinding roughages will pay even better dividends. Papec Hammer Type Grinders handle bulky crops as well as grain because they have governor-controlled, self-feed rolls. With a Papec you can make rations right on your farm that will reduce and perhaps eliminate your commercial feed bill. Your feed is ground exactly the way you want it, when you want it and at a real saving in the cost of hauling your grain to mill. Come in and investigate this grinder for yourself or drop us a line for complete literature.

PAPEC 1/2-TON FEED MIXER

If you have been mixing your feeds by hand here is good news for you. The new Papec half ton batch mixer will prepare your rations a whole lot easier and cheaper than you can do the job in any other way. Delivered to you completely assembled ready to go to work. Operates with small gas engine or electric motor. Thoroughly tested and recommended by practical farmers and experiment stations. After you have used a Papec Mixer for a month you will wonder how you ever got along without it. Send for Feed Mixer Folder and price today.

THE SALES SENSATION OF 62 YEARS IN WASHING MACHINES

Horton No. 1 DeLuxe Electric Washer With the Preeminent Feature of the Year—

"THE AUTO-SAFE FOUR ROLL WRINGER"

Perfect safety—no chance of fingers being caught. Automatic overload release—in case of excess load the rolls part automatically avoiding the possibility of jamming or damage

Oversize tub, porcelain enameled inside and out, set in rubber. Large aluminum agitator. Floating power, $\frac{1}{4}$ H. P. electric motor.

Color: Buff Tub; Green Chassis.

No. 15 DeLuxe Electric, without pump, weight crated 212 lbs.Each **\$100.00**

No. 15P DeLuxe Electric, with water discharge pump, weight crated 217 lbs.Each **\$110.00**

No. 14 CUSTOM ELECTRIC WASHER

Oversize tub, porcelain inside and out, set in rubber, clamped to frame; special three-wing submerged type agitator displaces more water per minute; sealed mechanism; floating power motor; latest type Lovell wringer with full balloon rolls, easier acting, more convenient safety release.

Color: Harmonizing shades of green.

No. 14 Custom Electric, without pump, weight crated 194 lbs.Each **\$85.00**

No. 14P Custom Electric with water discharge pump, weight crated 199 lbs.Each **\$95.00**

No. 12 STANDARD ELECTRIC WASHER

Great value due to Horton's exclusive features: Sealed mechanism; large porcelain tub set in rubber, clamped to frame; $\frac{1}{4}$ H. P. floating power motor; conventional type

wringer with $2\frac{1}{4}$ inch balloon rolls; large four-wing submerged type aluminum agitator with special non-tarnish finish. Color combination: Beautiful shades of green.

No. 12 Standard Electric, without pump, weight crated 178 lbs.Each **\$65.00**

No. 12P Standard Electric, with water discharge pump, weight crated 184 lbs.Each **\$75.00**

No. 16 STANDARD GASOLINE ENGINE WASHER

For homes where electricity is not available this Horton Washer, identical with the No. 3 Standard, is supplied with latest Briggs & Stratton engine instead of electric motor. Four cycle type, $\frac{1}{2}$ H. P., air-cooled; pedal starter. Separate tanks for oil and gasoline. Engine may also be used for other purposes.

No. 16 Standard Gasoline Engine Washer, weight crated 229 lbs.Each **\$90.00**

Horton 11. Standard size porcelain tub, partially corrugated sides. Pressure cleansing wringer with balloon rolls and end release for safety. Four-wing built-up agitator, 12-inch diameter. High speed mechanism, sealed and permanently lubricated. Quarter H.P. electric motor, cushioned in rubber. Steel casters, 2-inch diameter. Green tub with harmonizing darker green chasis.

No. 11 **\$49.50**
